Energy Conscious Design A Primer For Architects:

Energy Conscious Design John R. Goulding,1992 European Directory of Sustainable and Energy Efficient Building
1999 John Goulding,2014-05-01 This directory has become a valued source of information for energy efficient building
designers and specifiers throughout Europe and the details and scope of product service and supplier listings have again
been extensively updated for this edition *Energy-Efficient Timber-Glass Houses* Vesna Žegarac Leskovar,Miroslav
Premrov,2013-09-30 The book discusses combining timber and glass two eco materials with a view to developing an optimal
contemporary energy efficient house with an attractive design Furthermore the book connects an architectural design
approach with structural research to show the possibilities of stabilizing the building with an increased size of the glazing
Research results where the glazing is considered as a load bearing structural element are therefore presented in a manner
leading to the development of an optimal model of the timber glass house considering both the structural and energy related
aspects The presented research work can be useful to designers and future experts in their planning of optimal energy
efficient timber buildings The study is based on using timber and glass which were previously neglected as construction
materials With suitable technological development and appropriate use they are nowadays becoming essential construction
materials as far as energy efficiency is concerned However their combined use is extremely complicated from both the
constructional point of view as well as from that of energy efficiency and sets multiple traps for designers A good knowledge
of their advantages and drawbacks is thus vitally important which is shown in the present monograph Energy efficient timber
glass houses was selected by the Slovenian National Research Agency as an extraordinary scientific achievement in the field
of technical sciences civil engineering for the year 2013 **The Climatic Dwelling** Eoin O. Cofaigh,John A. Olley,J. Owen
