Energy Technology Innovation Arnulf Grubler, Charlie Wilson, 2014 An edited volume on factors determining success or failure of energy technology innovation for researchers and policy makers **Energy Technology Innovation** Arnulf Grubler, Charlie Wilson, 2014 **Low Carbon Energy Transitions** Kathleen M. Araújo, 2017 Examines four long term cases of nations shifting to low carbon energy sources from dependence on fossil fuels in order to discuss better ways for a nation to make such a transition Handbook of Energy Economics and Policy Alessandro Rubino, Alessandro Sapio, Massimo La Scala, 2021-05-01 Handbook of Energy Economics and Policy Fundamentals and Applications for Engineers and Energy Planners presents energy engineers and managers with analytical skills and concepts that enable them to apply simple economic logic to understand the interrelations between energy technologies economics regulation and governance of the industry Sections cover the origins types and measurement of energy sources transportation networks and regulatory and policy issues on electricity and gas at a global level new economic and policy issues including innovation processes in the energy industry and economic and policy implications Final sections cover state of the art methods for modeling and predicting the dynamics of energy systems Its unique approach and learning path makes this book an ideal resource for energy engineering practitioners and researchers working to design develop plan or deploy energy systems Energy planners and policymakers will also find this to be a solid foundation on which to base decisions Presents key concepts and their interrelation with energy technologies and systems in a clear way for ready application during planning and deployment of energy technologies and systems Includes global case studies covering a wide array of energy sources and regulatory models Explores methodologies for modeling and forecasting the impacts of energy technologies and systems as well as their costs and possible business models New Approaches to Economic Challenges Systemic Thinking for Policy Making The Potential of Systems Analysis for Addressing Global Policy Challenges in the 21st Century OECD, International Institute for Applied Systems Analysis, 2020-02-27 In Systemic Thinking for Policy Making world experts from the OECD and International Institute for Applied Systems Analysis IIASA pool their expertise and experience to propose new approaches to analysing the interconnected trends and issues shaping today's and tomorrow's world **The Technological and Economic Future of Nuclear Power** Reinhard Haas, Lutz Mez, Amela Ajanovic, 2019-04-26 This open access book discusses the eroding economics of nuclear power for electricity generation as well as technical legal and political acceptance issues The use of nuclear power for electricity generation is still a heavily disputed issue Aside from technical risks safety issues and the unsolved problem of nuclear waste disposal the economic performance is currently a major barrier In recent years the costs have skyrocketed especially in the European countries and North America At the same time the costs of alternatives such as photovoltaics and wind power have significantly decreased **Journal of Economic Literature** ,1999 Current Index to Journals in Education ,2001 Guide to the History of Science ,1992 **ENERGY POLICY** , **Innovation for a Low Carbon**

Economy Tim Foxon, Jonathan Köhler, Christine Oughton, 2008 This book shows that although innovations in energy systems represent a core contribution to achieving national and international energy policy goals theoretical approaches to understanding innovation differ radically between separate disciplinary perspectives The need for greater mutual learning between these approaches is met within this study as international academics from economic institutional and management backgrounds share and analyse their respective approaches knowledge and insights
