Great Minds, 2013-11-04. Eureka Math A Story of Units. Eureka Math is based on the theory that mathematical knowledge is conveyed most clearly and effectively when it is taught in a sequence that follows the story of mathematics itself. In A Story of Units, our elementary curriculum, this sequencing has been joined with methods of instruction that have been proven to work in this nation and abroad. These methods drive student understanding beyond process to deep mastery of mathematical concepts. The goal of Eureka Math is to produce students who are not merely literate but fluent in mathematics. This teacher edition is a companion to Eureka Math online and EngageNY Sequence of Grade 2 Modules. Module 1: Sums and Differences to 20. Module 2: Addition and Subtraction of Length Units. Module 3: Place Value, Counting, and Comparison of Numbers to 1,000. Module 4: Addition and Subtraction Within 200 with Word Problems to 100. Module 5: Addition and Subtraction Within 1,000 with Word Problems to 100. Module 6: Foundations of Multiplication and Division. Module 7: Problem Solving with Length, Money, and Data. Module 8: Time, Shapes, and Fractions as Equal Parts of Shapes. Start Seeing and Serving Underserved Gifted Students. Jennifer Ritchotte, Chin-Wen Lee, Amy Graefe, 2020-10-21. 2020 TAGT Legacy Book Award for Educators Winner. Flexible tools help teachers see, understand, teach, challenge, and advocate for underserved gifted students. The underrepresentation of students from historically marginalized populations, including English language learners, twice exceptional students, culturally and linguistically diverse students, and economically disadvantaged students, in our gifted programs and services continues to be a critical issue in education. The importance of a caring and committed teacher who sees and supports the potential in all learners and who respects linguistic diversity and students' cultural identity cannot be overstated, yet teachers need the knowledge and training to do so. This reader-friendly guide meets that need, promoting equity in gifted education by providing teachers with a variety of flexible tools to nurture the academic and affective growth of their gifted students from traditionally underserved populations. Over fifty strategies are outlined within five chapters, addressing how teachers can see, understand, teach, challenge, and advocate for their underserved gifted learners in all content areas. The authors share numerous student quotes, teacher anecdotes, and spotlights on successful school efforts. Digital downloads include all forms from the book and a PDF presentation. A free PLC Book Study Guide for use in professional development is also available. Knowledge, Curriculum and Equity. Brian Barrett, Ursula Hoadley, John Morgan, 2017-07-20. In 2008, the first in a series of symposia established a social realist case for knowledge as an alternative to the relativist tendencies of the constructivist, post-structuralist, and postmodernist approaches dominant in the sociology of education. The second symposium focused on curriculum and the development of a theoretical language grounded in social realism to talk about issues of knowledge and curriculum. Finally, the third symposium brought

together researchers in a broad range of contexts to build on these ideas and arguments and with a concerted empirical focus bring these social realist ideas and arguments into conversation with data Knowledge Curriculum and Equity Social Realist Perspectives contains the work of the third symposium where the strengths and gaps in the social realist approach are identified and where there is critical recognition of the need to incrementally extend the theories through empirical study Fundamentally the problem that social realism is seeking to address is about understanding the social conditions of knowledge production and exchange as well as its structuring in the curriculum and in pedagogy The central concern is with the on going social reproduction of inequality through schooling and exploring whether and how foregrounding specialised knowledge and its access holds the possibility for interrupting it This book consists of 13 chapters by different authors working in Oceania Asia Europe Africa and North America From very different vantage points the authors focus their theoretical and empirical sights on the assumptions about knowledge that underpin educational processes and the pursuit of more equitable schooling for all
