Sustainable History and Human Dignity Nayef R.F. Al-Rodhan, 2022-01-27 Sustainable History and the Dignity of Man is a new philosophy of history This volume outlines how sustainable history is propelled by good governance which balances the tension between the attributes of human nature emotionality amorality and egoisms and human dignity needs such as reason security human rights accountability transparency justice opportunity innovation and inclusiveness The author proposes minimum criteria for good governance that are sensitive to local cultures and histories but meet certain common global values to ensure maximum and sustainable moral and political cooperation Using an ocean model of a single collective human civilisation the author argues that we should think in terms of a common human story that is comprised of multiple geo cultural domains and sub cultures with a history of mutual borrowing and synergies The author argues that today all geo cultural domains must succeed if humanity as a whole is to triumph This collective triumph will also depend on reason and a recognition that a great deal of knowledge is indeterminate and may be temporally spatially and perhaps culturally constrained as is outlined in the author's new theory of knowledge Neuro rational Physicalism Dr Nayef R F Al Rodhan is Senior Scholar in Geostrategy and Director of the Programme on the Geopolitical Implications of Globalisation and Transnational Security at the Geneva Centre for Security Policy Geneva Switzerland This book is an exceptionally wide ranging examination of past and present approaches to the securing of a qualitatively adequate social life on the planet The need for intercultural dialogue is pressing and stated as a matter of urgency in the text That argument is well presented and it is helpfully accompanied by a large amount of empirical evidence The book is also a strong and ethically attractive humanist statement about the value of human interaction that incorporates a vision of mutual respect based on a mixture of scientific arguments and normative aspirations Those features are very impressive Professor Michael Freeden Professor of Politics Director of the Centre for Political Ideologies Professorial Fellow Mansfield College University of Oxford United Kingdom

A Communitarian Theory of WTO Law Chios Carmody, 2023-12-21 Since 1995 there has been intense debate about whether the WTO Agreement is just Many observers point to the association of the treaty with intensive interdependence and the disruptive effects of globalization to assert that it is unjust Nevertheless justice in sovereign terms is different from justice in human terms This book puts forward a theory of WTO law to explain the difference and its implications for the international trading system It details how economic interdependence gives rise to an interdependent view of the relationship between different forms of justice and to interdependent obligations in WTO law It also suggests how the WTO dispute settlement system might have a residual value as a locus for transformative outcomes despite contemporary concerns about the system's political acceptability Taken together such insights may assist in identifying elements of a

Choudhury, 2025-11-05 Truth is not a possession it is the shared heritage of humanity The right to education implies the right to communicate truth based learning aligning with Article 29 of the UN CRC and Section 29 of India's RTE Act 2009 NCERT affirms that science is neutral and universally accepted by the global scientific community Yet this book argues that today's global education system shaped by UN led governance is flawed and self contradictory NASA driven global systems and UNESCO led curricula fail to deliver a truly neutral science as they contain logical inconsistencies and ethical fallacies Freedom of religion internationally recognized is inseparable from the right to communicate education grounded in natural truths such as the principle of creation in pairs Drawing upon both the Quran Kitaaba bil Haq and empirical evidence the book urges policymakers and educators to adopt frameworks that reflect nature's equal and opposite a priori principles an obligation reinforced by the UDHR and other human rights instruments At its core the book asserts that nature's equal and opposite a priori principle evident in creation in pairs and further exemplified by Newton's Third Law is fundamental to the universe Reality is governed by balanced and reciprocal relationships male and female day and night birth and death action and reaction that exist independently of human constructs Recognizing and restoring this natural equilibrium is essential for humanity to reclaim its inherent rights and free itself from misleading global narratives The denial of creation in pairs is therefore a denial of nature's universal and self evident law of balance [The Book Review Digest](#) ,2004 **Encyclopedia**
