Endless War Hidden Functions Of The War On Terror:

Endless War? David Keen, 2006-04-20 Was the Iraq war really an act of goodwill to liberate people from injustice Or was it a strategic move to maintain US dominance globally This book casts a critical light on the real motives behind war and conflict David Keen explores how winning war is rarely an end in itself rather war tends to be part of a wider political and economic game that is consistent with strengthening the enemy Keen devises a radical framework for analysing an unending war project where the war on terror is an extension of the Cold War The book draws on the author's detailed study of wars in Sudan Sierra Leone as well as in a range of other conflicts *War on Terror* Stipe Buzar, Jean-François Caron, 2024-04-01

Looking back at the War on Terror and its policies actions and the violence that followed this book analyzes the resulting changes in international power structures and the relationship between citizens and their representatives It defines our shortcomings in opposing this type of violence by demonstrating how the notion of legitimate violence has been broadened The impact of the War on Terror on the public view of Liberalism is explored as well as its effects on the role of state authorities in our lives Thus this book names the lessons we ought to learn from the actions taken against terrorist organizations

States of War since 9/11 Alex Houen, 2014-02-03 This multidisciplinary edited volume explores how the spread of the War on Terror has entwined matters of state sovereignty and states of war into mutually affecting relations Pre-emptive attacks on terrorist groups in rogue states outsourcing of state militancy and the mutable state of armed conflict required to wage a hybrid war have increasingly been issues for the War on Terror Moreover such measures have seen the spread of this war to countries such as Israel Russia Ethiopia and Uganda all of whom have justified their own attacks in other nation states as a war of self defence against terrorism States of War since 9 11 offers a timely innovative analysis of how the War on Terror has taken on different modes of militancy and militarisation in spreading to different nation states and regions Featuring a multidisciplinary line up of eminent contributors the book ranges in reference from the early stages of the war up to France's 2013 intervention in Mali Part One examines the various modes of war and militarisation that have been employed in particular nation states including Afghanistan Russia and Chechnya and Israel and Palestine Part Two examines how the war's innovations have more generally involved just war theory biopolitics and sovereignty networked battlespace new military urbanism citizenship homeland security and surveillance Overall this book offers a fresh insight into how states have attempted to secure their own bounds by extending the boundaries of war itself This book will be of much interest to students of critical terrorism studies foreign policy and IR in general [Japan and the War on Terror](#) Michael

Penn, 2014-07-11 The role of the Far East is becoming increasingly important in global geopolitics Japan's economic might and sphere of geographical influence between China North Korea and the US means it has the potential to be a major ally in the War on Terror While Japan's constitution does not allow for militarism or acts of war in the post 9 11 world the use of the Japanese nation's Self Defence Force has become increasingly normal a result of the exploitation of legal loopholes and

political double speak that has been used to bypass Japan's pacifist ideology Here Michael Penn assesses the role of US diplomats and lobbyists in Tokyo the politicians who see the War on Terror as a means of self advancement and the influence of Washington in the unprecedented deployment of Japanese troops in Iraq Written using a huge range of primary source material including interviews with US insiders and Japanese policy makers this is a scholarly and lucid account of Japan's relationship to the US and the Middle East from 9 11 to Barack Obama and the death of Osama Bin Laden **Endless War?** David Keen, 2006-04-20 Endless War casts a critical light on the real motives behind war and terror David Keen explores how winning war is rarely an end in itself rather war often provides cover for wider political and economic games in which strengthening the enemy is either irrelevant or positively useful Keen devises a radical framework for analysing an unending war project where violence creates its own legitimacy and where the war on terror is only the latest extension of a Cold War project **BOOK JACKET** *War and Aesthetics* Jens Bjerring, Anders Engberg-Pedersen, Solveig Gade, Christine Strandmose Toft, 2024-06-18 A provocative edited collection that takes an original approach toward the black box of military technology surveillance and AI and reveals the aesthetic dimension of warfare *War and Aesthetics* gathers leading artists political scientists and scholars to outline the aesthetic dimension of warfare and offer a novel perspective on its contemporary character and the construction of its potential futures Edited by a team of four scholars Jens Bjerring Anders Engberg Pedersen Solveig Gade and Christine Strandmose Toft this timely volume examines warfare through the lens of aesthetics arguing that the aesthetic configurations of perception technology and time are central to the artistic engagement with warfare just as they are key to military AI weaponry and satellite surveillance People mostly think of war as the violent manifestation of a political rationality But when war is viewed through the lens of aesthesis meaning perception and sensibility military technology becomes an applied science of sensory cognition An outgrowth of three war seminars that took place in Copenhagen between 2018 and 2021 *War and Aesthetics* engages in three main areas of inquiry the rethinking of aesthetics in the field of art and in the military sphere the exploration of techno aesthetics and the wider political and theoretical implications of war technology and finally the analysis of future temporalities that these technologies produce The editors gather various traditions and perspectives ranging from literature to media studies to international relations creating a unique historical and scientific approach that broadly traces the entanglement of war and aesthetics across the arts social sciences and humanities from ancient times to the present As international conflict looms between superpowers *War and Aesthetics* presents new and illuminating ways to think about future conflict in a world where violence is only ever a few steps away Contributors Louise Amoore Ryan Bishop Jens Bjerring James Der Derian Anthony Downey Anders Engberg Pedersen Solveig Gade Mark B Hansen Caroline Holmqvist Vivienne Jabri Caren Kaplan Phil Klay Kate McLoughlin Elaine Scarry Christine Strandmose Toft Joseph Vogl Arkadi Zaides *Crimes of Power & States of Impunity* Michael Welch, 2009 Since 9 11 a new configuration of power situated at the core of the executive branch of the U S government has taken hold In

Crimes of Power States of Impunity Michael Welch takes a close look at the key historical political and economic forces shaping the country's response to terror Welch continues the work he began in *Scapegoats of September 11th* and argues that current U.S. policies many enacted after the attacks undermine basic human rights and violate domestic and international law He recounts these offenses and analyzes the system that sanctions them offering fresh insight into the complex relationship between power and state crime Welch critically examines the unlawful enemy combatant designation Guantanamo Bay recent torture cases and collateral damage relating to the war in Iraq This book transcends important legal arguments as Welch strives for a broader sociological interpretation of what transpired early this century analyzing the abuses of power that jeopardize our safety and security *Journal of Peace Research* ,2007-11 **Terror and Its Representations** Larry Portis, Joseph Zitomersky, 2008 What are the origins and nature of terror and terrorism in the United States and beyond This book of essays about the history and contemporary reality of terror reveals little known aspects of a compelling subject Since the American and French Revolutions governments and their opponents have used terror and terrorism for different political reasons We learn how terror and terrorism have marked the evolution of social values and have entered into cultural expression of all types literature music television cinema and have influenced the formation of ideologies and political institutions The authors of the introduction and eighteen chapters comprising *Terror and Its Representations* show how a sensitive subject can be treated with conviction while maintaining the critical distance necessary for serious debate **Uncharted Territory** Sara Pantuliano, 2009 *Uncharted Territory* bridges the humanitarian and land tenure divide and seeks to understand how housing land and property issues can and should be practically incorporated into humanitarian responses The book explores the theoretical nexus between land conflict and humanitarianism discusses the challenges for a more integrated response and presents the findings of case studies from Angola Colombia Rwanda and Sudan **The Benefits of Famine** David Keen, 2008 Who benefits from famine When is famine part of a national strategy David Keen's pioneering study revealed how a network of government officials merchants transport owners and militia members profited from the Sudan's famine of the late 1980s The 1988 famine was a dress rehearsal for Darfur A similar network of beneficiaries operates in Darfur today **BOOK JACKET** [The Korean Journal of Policy Studies](#) ,2013 **Von Marokko bis Afghanistan** Jochen Hippler, 2008 **Sticks & Stones** Padraig O'Malley, Paul L. Atwood, Patricia Peterson, 2006 Albert Einstein famously remarked that he did not know what weapons would be used in World War III but World War IV would be fought with sticks and stones In this volume a distinguished group of scholars government officials politicians journalists and statesmen examine what can be learned from the wars of the twentieth century and how that knowledge might help us as we step ever so perilously into the twenty first Following an introduction by Padraig O'Malley the book is divided into four sections Understanding the World as We Have Known It Global Uncertainties Whose Values Whose Justice and Shaping a New World **Jesus in an Age of Terror** James G. Crossley, 2008

This book applies the work of Noam Chomsky Edward Herman Edward Said and several others on international politics and the supportive role of the media intellectuals and academics to contemporary Christian origins and New Testament scholarship Part One looks at the ways in which New Testament and Christian origins scholarship has historically been influenced by its political and social settings over the past hundred years or so Moving on to the present the following chapter then applies Herman and Chomskys propaganda model of manufacturing consent in the mass media to the recent explosion of biblical scholars writing on the internet in particularly biblio bloggers It is clear that political views in biblio blogging conform strikingly to the emphases that come through in Herman and Chomskys analysis of the mass media and intellectuals particularly with the standard lines on the war on terror and views on the contemporary Middle East The rest of the book takes up modified key areas of the propaganda model in more detail Part Two looks at the Orientalist rhetoric of clashing civilisations and how this relates to the war on terror and the creation of Islam Arabs Middle East etc as the Great Enemy in the media and relevant intellectual thought since the 1970s and to use Derek Gregorys phrase hideously emboldened in the war on terror The next chapter then shows how this context has had a highly noticeable impact on the use of social sciences in New Testament and Christian origins scholarship in particular the stark generalisations of scholars using cultural social anthropology based on contemporary studies of the Middle East Disturbingly some of this scholarship has many rhetorical links with Anglo American foreign policy interests in the Middle East and beyond making some politically charged statements that cohere closely with recent intellectual defences of actions in Iraq Palestine and beyond Part Three looks at issues of Palestine and Israel in the media alongside Christian secular and relevant intellectual thought since the Six Day War of 1967 focusing in particular on the dramatic shift towards widespread support for Israel This also includes an analysis of the recent and controversial case of Nadia Abu el Hajs tenure at Barnard The following chapter shows how this interest in Israel has had a profound impact on historical Jesus and Christian origins studies particularly the strange emphasis on Jewishness and misplaced allegations of antisemitism since the 1970s Despite the shift in support of Israel this is rarely done for love of Jews Judaism Israel or Israelis because there remains a notable cultural political and religious superiority in Anglo American scholarship While owing much also to an Orientalist tradition this too is strongly echoed in scholarship of Christian origins where for all the emphasis on the Jewishness of Jesus and the first Christians it is extremely common to find Jesus or the first Christians being better than Judaism or overriding key symbols of Judaism as constructed by scholarship done ironically by frequent ignoring of relevant Jewish texts The end results of contemporary scholarship are not dramatically different from the results of the anti Jewish and antisemitic scholarship of much of the twentieth century
