Endurance And War The National Sources Of Military Cohesion:

Endurance and War Jasen J. Castillo, 2014-04-09 Scholars and military practitioners alike have long sought to understand why some country's militaries fight hard when facing defeat while others collapse In *Endurance and War* Jasen Castillo presents a new unifying theory cohesion theory to explain why national militaries differ in their staying power His argument builds on insights from the literatures on group solidarity in general and military effectiveness in particular which argue that the stronger the ties binding together individuals in a group of any kind the higher the degree of cohesion that a group will exhibit when taking collective action including fighting in war Specifically he argues that two types of ties determine the cohesion and therefore the resilience of a nation's armed forces during war the degree of control a regime holds over its citizens and the amount of autonomy the armed forces possess to focus on training for warfighting Understanding why armed forces differ in their cohesion should help U S military planners better assess the military capabilities of potential adversaries like Iran and North Korea For scholars of international politics cohesion theory can help provide insights into how countries create military power and how they win wars *National Will to Fight*

McNerney, Connable, Zimmerman, Lander, Posard, Castillo, Madden, Blum, Frank, Fernandes, Seol, Paul, Parasiliti, 2018-09-07 In this report RAND researchers explore the factors contexts and mechanisms that shape a national government's decision to continue or end military and other operations during a conflict i e national will to fight To help U S leaders better understand and influence will to fight the researchers propose an exploratory model of 15 variables that can be tailored and applied to a wide set of conflict scenarios **The Dictator's Army** Caitlin Talmadge, 2015-07-31 In *The Dictator's Army* Caitlin

Talmadge presents a compelling new argument to help us understand why authoritarian militaries sometimes fight very well and sometimes very poorly Talmadge's framework for understanding battlefield effectiveness focuses on four key sets of military organizational practices promotion patterns training regimens command arrangements and information management Different regimes face different domestic and international threat environments leading their militaries to adopt different policies in these key areas of organizational behavior Authoritarian regimes facing significant coup threats are likely to adopt practices that squander the state's military power while regimes lacking such threats and possessing ambitious foreign policy goals are likely to adopt the effective practices often associated with democracies Talmadge shows the importance of threat conditions and military organizational practices for battlefield performance in two paired comparisons of states at war North and South Vietnam 1963 1975 and Iran and Iraq 1980 1988 Drawing on extensive documentary sources her analysis demonstrates that threats and practices can vary not only between authoritarian regimes but also within them either over time or across different military units The result is a persuasive explanation of otherwise puzzling behavior by authoritarian militaries *The Dictator's Army* offers a vital practical tool for those seeking to assess the likely course costs and outcomes of future conflicts involving nondemocratic adversaries allies or coalition partners *Tempting Fate* Paul C. Avey, 2019-11-15

Unpacking of the dynamics of conflict under conditions of nuclear monopoly Paul C Avey argues in *Tempting Fate* that the costs and benefits of using nuclear weapons create openings that weak nonnuclear actors can exploit Avey uses four case studies to show the key strategies available to nonnuclear states Iraqi decision making under Saddam Hussein in confrontations with the United States Egyptian leaders thinking about the Israeli nuclear arsenal during wars in 1969 70 and 1973 Chinese confrontations with the United States in 1950 1954 and 1958 and a dispute that never escalated to war the Soviet United States tensions between 1946 and 1948 that culminated in the Berlin Blockade Strategies employed include limiting the scope of the conflict holding chemical and biological weapons in reserve seeking outside support and leveraging international non use norms Avey demonstrates clearly that nuclear weapons cast a definite but limited shadow and while the world continues to face various nuclear challenges understanding conflict in nuclear monopoly will remain a pressing concern for analysts and policymakers Thanks to generous funding from Virginia Tech and its participation in TOME the ebook editions of this book are available as Open Access volumes available from Cornell Open cornellpress.cornell.edu/cornell-open and other repositories

Rising Titans, Falling Giants Joshua R. Itzkowitz Shiffrinson, 2018-09-15 As a rising great power flexes its muscles on the political military scene it must examine how to manage its relationships with states suffering from decline and it has to do so in a careful and strategic manner In *Rising Titans Falling Giants* Joshua R Itzkowitz Shiffrinson focuses on the policies that rising states adopt toward their declining competitors in response to declining states policies and what that means for the relationship between the two *Rising Titans Falling Giants* integrates disparate approaches to realism into a single theoretical framework provides new insight into the sources of cooperation and competition in international relations and offers a new empirical treatment of great power politics at the start and end of the Cold War Shiffrinson challenges the existing historical interpretations of diplomatic history particularly in terms of the United States China relationship Whereas many analysts argue that these two nations are on a collision course Shiffrinson declares instead that rising states often avoid antagonizing those in decline and highlights episodes that suggest the US China relationship may prove to be far less conflict prone than we might expect

Cohesion Wm. Darryl Henderson, 2020-11-19 One of the perils for military planners in a high tech world is to be taken in

by the destructiveness of modern weapons and to give in to the currently popular theory that modern war will last for days or weeks rather than months or years in short to envision a world where technologies not people dominate war We can ill afford to dismiss the human element in combat The stakes are far too great Colonel Wm Darryl Henderson US Army maintains that we cannot expect tactical situations in future fields of battle to be devoid of the human factor Most recently for example Iraq s war with Iran was potentially a high tech and swift war That war is entering its fourth year and has cost to date 900 000 lives Cohesion mutual beliefs and needs that cause people to act as a collective whole has so far played a more significant role in the Iran Iraq war than all the sophisticated weapons on either side Does American society produce the type of soldier who would under stress suppress his individuality and act for the mutual good of the group In the post Vietnam all volunteer force environment the kind of American citizen attracted to military service the qualities he carries from society and what qualities the military organization is able to impart to him must be a matter for serious thought and planning Colonel Henderson s work is a step in that direction **The Lancet** ,1947 *The Physician Throughout the Ages* Arthur Selwyn-Brown,1938
