Energy Innovation Fixing The Technical Fix:

Energy Innovation - Fixing the Technical Fix Lewis Perelman, 2012 Energy policy is a mess a tangle of interconnected problems stirred by competing political agendas Whether it s soaring fuel prices noxious pollution climate worries security risks or threats to the economy and jobs energy politics are vexed by the tendency of single issue solutions to make other problems worse Many look to technology to break the logjam But current energy technology mostly is either cheap or clean not both With Energy Innovation Lewis J Perelman builds on the emerging consensus of leading analysts who insist that accelerating innovation to create new breakthrough technology is essential to resolving the mess of energy related problems Yet Perelman warns that achieving really effective technical fixes is easier said than done Simply throwing more money at R D is not the answer The author lists a number of real world hurdles to creating useful innovations including corruption special interest lobbying money and budget issues tensions between government and private sector roles and political instability And financially strapped governments simply may not have the money others have called for To fix the technical fix Perelman proposes a Plan B strategy for innovation on a budget Plan B begins with the recognition that a big energy innovation program need not be big in cost to the public treasury to be big in the scope of its reach engagement diversity and impacts Instead Plan B emphasizes decentralizing and opening up energy innovation efforts to broad international participation by individuals businesses philanthropies and nongovernment nonacademic organizations taking full advantage of the mesh of modern information technology In Perelman s prescription the open innovation model increasingly being applied in both science and industry provides the key to untangling the energy policy mess Recent experience shows that open crowdsourcing can produce solutions in as little as days to problems that have stumped experts for years Applying social and political realism to the big picture of technical challenges Energy Innovation provides an original timely roadmap toward a more energy secure global economy

Technological Innovation Patrick Kelly, 1978 Nature Sir Norman Lockyer, 2008 **Proceedings of the 1979 National Conference on Technology for Energy Conservation, January 23-25, 1979, Tucson, Arizona**, 1979 **Proceedings of the Ontario Industrial Waste Conference**, 1973 **The Politics of Problem Definition** David A. Rochefort, Roger W. Cobb, 1994 At the nexus of politics and policy development lies persistent conflict over where problems come from what they signify and based on the answers to those questions what kinds of solutions should be sought Policy researchers call this process problem definition Written for both scholars and students this book explains how and why social issues come to be defined in different ways how these definitions are expressed in the world of politics and what consequences these definitions have for government action and agenda setting dynamics The authors demonstrate in two theoretical chapters and seven provocative case studies how problem definition affects policymaking for high profile social issues like AIDS drugs and sexual harassment as well as for problems like traffic congestion plant closings agricultural tax benefits and air transportation By examining the way social problems are framed

for political discussion the authors illuminate the unique impact of beliefs values ideas and language on the public policymaking process and its outcomes In so doing they establish a common vocabulary for the study of problem definition review and critique the insights of existing work on the topic and identify directions for future research Nuclear Energy Facility Siting in the United States Robert W.
