## **Energy Security And Climate Change Triangle Papers:**

China, Oil and Global Politics Philip Andrews-Speed, Roland Dannreuther, 2011-05-12 This book provides a critical overview of how China's growing need for oil imports is shaping its international economic and diplomatic strategy and how this affects global political relations and behaviour. It draws together the various dimensions of China's international energy strategy and provides insights into the impact of this on China's growing presence across the world.

**Earth at Risk in the 21st Century: Rethinking Peace, Environment, Gender, and Human, Water, Health, Food, Energy Security, and Migration** Úrsula Oswald Spring, 2020-04-03 Earth at Risk in the 21st Century offers critical interdisciplinary reflections on peace, security, gender relations, migration and the environment, all of which are threatened by climate change, with women and children affected most. Deep-rooted gender discrimination is also a result of the destructive exploitation of natural resources and the pollution of soils, water, biota and air. In the Anthropocene, the management of human society and global resources has become unsustainable and has created multiple conflicts by increasing survival threats primarily for poor people in the Global South. Alternative approaches to peace and security, focusing from bottom up on an engendered peace with sustainability, may help society and the environment to be managed in the highly fragile natural conditions of a hothouse Earth. Thus, the book explores systemic alternatives based on indigenous wisdom, gift economy and the economy of solidarity, in which an alternative cosmovision fosters mutual care between humankind and nature. Special analysis of risks to the survival of humankind in the 21st century. Interdisciplinary studies on peace, security, gender and environment related to global environmental and climate change. Critical reflections on gender relations, peace, security, migration and the environment. Systematic analysis of food, water, health, energy security and its nexus. Alternative proposals from the Global South with indigenous wisdom for saving Mother Earth.

**The Triangle papers** John M. Deutch, 2007 *Energy Security Challenges for the 21st Century* Gal Luft, Anne Korin, 2009-08-10 The impact of energy on global security and economy is clear and profound, and this is why in recent years energy security has become a source of concern to most countries. However, energy security means different things to different countries based on their geographic location, their endowment of resources, their strategic and economic conditions. In this book, Gal Luft and Anne Korin, with the help of twenty leading experts, provide an overview of the world's energy system and its vulnerabilities that underlay growing concern over energy security. It hosts a debate about the feasibility of resource conflicts and covers issues such as the threat of terrorism to the global energy system, maritime security, the role of multinationals and non-state actors in energy security, the pathways to energy security through diversification of sources and the development of alternative energy sources. It delves into the various approaches, selected producers, consumers and transit states have toward energy security and examines the domestic and foreign policy tradeoffs required to ensure safe and affordable energy supply. The book explains the various pathways to energy security and the tradeoffs among them and demonstrates how all these factors can be integrated in a larger foreign

and domestic policy framework It also explores the future of nuclear power the complex relations between energy security and environmental concerns and the role for decentralized energy as a way to enhance energy security *Global Warming and Climate Change* A.
