**Imitation, Counterfeiting and the Quality of Goods in Modern Asian History** Kazuko Furuta,Linda Grove,2017-10-12 This book focuses on the production of low quality goods the rise of markets for imitations and shoddy goods and dishonest trading practices which developed along with the expansion of global trade in the nineteenth and twentieth centuries in East Asia Fake imitation counterfeit and adulterated goods have long plagued domestic and international trade While we are all familiar with contemporary attempts to control the manufacture and sales of such goods economic historians have given the subject little attention despite the fact that the growth of international trade and the lengthening of commodity chains played a major role in the spread of such practices The problem is approached in several ways Part I of the book examines the ways in which the asymmetry of product quality information was reduced and mechanisms were developed to bring greater order in the markets using case studies on cotton fiber silk pongee cotton cloth fertilizer and tea Part II of the book focuses on problems associated with imported everyday use items which are referred to here as small things and the role played by imitations of such everyday goods as soap matches glass bottles and toys in the development of the modern economies of Japan China and Taiwan The project brings together the work of an international team of scholars who offer important historical perspectives on these issues exploring the ways in which new institutions were created that continue to play a role in contemporary global economic activities

local industrialists were responsible for it quickly becoming the largest industrial city in China outside treaty ports. They built factories, roads, and other infrastructure outside the old city walls and in surrounding towns and villages. Chapters examine the county's transformation as recorded in guidebooks and travel magazines of the time and the role of the state in the early 1920s and into the Nanjing Decade when new administrative laws led to the continued expansion of the city under both municipal and county officials. They explore the revival of the silk industry during the Japanese occupation and the industry's role in driving urbanization as well as efforts by Chinese leaders to carry out prewar development plans despite lockdowns and qingxiang clean the countryside campaigns. In the midst of the barbed wire and watch towers, plans to shape the built environment in Wuxi County and the region as a whole persisted and were carried out. Ambitious and well researched *Urbanizing China in War and Peace* will appeal to scholars and students of Chinese urban history, the Anti-Japanese War of Resistance, and the Republican period. Its engagement with issues of urbanization in general will interest urban historians of other times and places.

**Copyright Matters** Lena Henningsen, 2010. In her first book, Lena Henningsen offers five studies that challenge the wide spread prejudice among the Western Press that China is an empire of plagiarism, sometimes even referred to as the People's Republic of Cheats. By analyzing the cases of convicted plagiarist Guo Jingming, the victim of plagiarism Han Han, the follow up publications to Jiang Rong's *Wolf's Totem*, the Harry Potter fakes, and fan fiction, as well as discussions of academic plagiarism, Henningsen proves that copyright increasingly matters to Chinese writers. Confronted with instances of copyright infringements on their own works, they voice their opposition and fight for their rights, be it through legal action or their writing. At the same time, the author demonstrates that a text that is commonly considered to be plagiarized or imitated may turn out to be a highly creative work in its own right. For example, when Harry Potter appears as a timid exchange student in China. Therefore, Henningsen opts for a literary reading of these derivative works and argues that imitation may at times be a creative tool. While these two central arguments appear to be contradictory, the author shows that they represent two sides of the same coin: the emergence of a new self-conception among Chinese authors as they struggle to recast their relationship with society and state.
