Henke, Paul R. Krausman, 2017-09 Published in association with The Wildlife Society **Who Cares About Wildlife?** Michael J. Manfredo, 2009-06-29 *Who Cares About Wildlife* integrates social science theory in order to provide a conceptual structure for understanding and studying human interaction with wildlife A thorough review of the current literature in conceptual areas including norms values attitudes emotions wildlife value orientations cultural change and evolutionary forces inherited tendencies is provided and the importance of these areas in studying human wildlife relationships is highlighted No other book both considers the human relationship with wildlife and provides a theoretical framework for understanding this relationship on the individual as well as cultural level *Who Cares About Wildlife* will be valuable both to students and to practitioners in wildlife management and conservation as well those interested in the human relationship with wildlife natural resources and the environment **The Endangered Species Act** Brian Czech, Paul R. Krausman, 2001-03-14 The new model of policy design theory frames the discussion regarding the frequently analyzed Endangered Species Act in this historical perspective Since the 1970s the Endangered Species Act (ESA) by virtue of its regulatory impact has been a frequent subject of policy analysis In this comprehensive history and critique of

the ESA Brian Czech and Paul R Krausman incorporate the new model of policy design theory to frame a larger discussion about conservation biology and American democracy Czech and Krausman provide a historical background of endangered species policy that integrates natural history socioeconomic trends political movements and professional developments Outlining the controversies surrounding the ESA they find a connection between challenges to species conservation and challenges to democracy After an assessment of ESA analyses that have been performed from traditional perspectives they engage policy design theory to review the structural logic of the ESA analyzing each clause of the legislation for its application of the fundamental elements of democracy To address the technical legitimacy of ESA they propose two new genetic considerations functional genome size and molecular clock speed to supplement phylogenetic distinctiveness as criteria with which to prioritize species for conservation Next they systematically describe the socioeconomic context of ESA by assessing and classifying the causes of species endangerment A hybrid of policy analysis and ecological assessment The Endangered Species Act History Conservation Biology and Public Policy will appeal to scholars and students in the fields of natural resource policy and law conservation biology political science wildlife ecology and environmental history and to professionals at agencies involved in wildlife conservation Interesting for anyone concerned about the preservation of species and more generally the global environment a good explanation of the statute a wonderful and often entertaining description of how we view and rank nonhuman species and a provocative critique of the very policy analytic framework the authors have employed Joseph F C DiMento Environment Czech and Krausman are effective and original scholars The Endangered Species Act History Conservation Biology and Public Policy is both a treatise on policy assessment and an excellent history assessment and discussion of the ESA itself Those interested in natural resources policy and those interested specifically in the ESA will want to read this book Jack Ward Thomas The University of Montana Chief Emeritus U S Forest Service
