The term exoticism is derived from the noun exotic. According to the English dictionary, the term exotic means something that is unusual and exciting, usually because it is related or comes from a distant country. Exoticism thus is an imitation of elements in alien cultures that obviously differ from the native traditions (Font 201). It can also be summed up as a quality of expressing unusual or interesting because of association with a distant country. Exoticism encompasses numerous genres of the period notably in music decorative art and painting. The styles blend with the newly introduced idea or novelty in culture, physical items, and more specifically music. It is from the musical perspective that the ideas of exoticism have been much exploited as the music keeps on changing from one generation to the next (Font 207). Musically, the genre exhibits rhythms, and melodies and instrumentals designed to evoke the atmosphere of novelty. Moreover, the interior decorative as used in modern architecture depicts fantasies and opulence.

Looking at the Debussys point of the definition, one would otherwise, seek to provide the exoticism in its real context. From his affinity of defying traditional Western harmonic rules, Debussy did an experimentation with unique sonorous. He instead, wanted to come up with music that could otherwise be supply to the lyrical effusion of the soul and fantasies of dreams. Thus according to Rudolph, at the tender age of seven, Debussy began his piano lessons together with an Italian violist Jean Cerutti (Herring 72). Debussy became experimental from the outset incorporating dissonances at an interval that were not often taught at the academy of his training. He grew up to a brilliant pianist with several pieces he played being sonata movements, Weber and Chopins Ballade. Moreover, by fusing Western techniques he learned in at the Paris Conservatoire and some Eastern elements, Debussy artistically introduced an exotic sample of music. From his work, musical exoticism can, therefore, be stated as borrowing or use of musical materials that evoke distant alien frame of references (Herring 79). Those otherwise calls for easy recognition of musical gestures from the foreign culture and assimilated into a more familiar style providing it with an exotic color and image.

Discussion of musical exoticism has become more varied and complex as pieces are often composed that aligns to the transcultural, which is a composing method of Western countries. The transcultural being seen as an incorporating certain stylistic and formal conventions of another cultures music (Herring 80). Pieces that relates to transcultural composing blend or merge elements of music that the composer would otherwise recognize as being own in contrast to those of distant cultures.

Considering *Pour le piano*, Debussy further experimented the new sonorous he learned while observing the Javanese gamelan at the Exposition. By using the newer techniques learned, and keeping in touch with some Western elements, he went on to compose a novelty to which, many argued as the most famous, efficient and exotic music (Locke 477). To expound on the novelty of the new music, Debussy extracted musical elements from the gamelan and incorporated them into his music. The items that he obtained included the pentatonic scale to mimic the gamelan scale, layering to symbolize the serene gradual addition of instruments in the gamelan, and base suspension to represent the clanging bells.
