Essentials of Argument Arthur Parker Stone, 2023-07-18 Essentials of Argument is a textbook designed to help students develop and refine their persuasive writing and reasoning skills It provides a step by step approach to argumentation from identifying claims and evidence to constructing counterarguments and rebuttals The book also features numerous examples exercises and case studies drawn from a wide variety of fields and contexts Written by two experienced instructors Essentials of Argument is an accessible and engaging resource for students and educators alike This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant Essentials of Argument (Classic Reprint) Arthur Parker Stone, 2015-07-09 Excerpt from Essentials of Argument A down east farmer whose given name was Aminadab was wont to tell his friends that he was the tenth son of his parents and that all the good names had been used up when they got down to him We are not apologizing for the title of this book but certain it is that the number of books written on this subject is legion It is true that some of these come to our attention at the present time merely as curiosities but many have survived and are popular on account of admirable qualities Why then should there be a new text book It may be that the controlling reason is the desire which comes to every teacher to put his particular theories into print Yet the authors of this work believe that their book has another reason for existence If we thought that we had some peculiar hobbies or novel methods of instruction it would indeed be doubtful if anything was being added to the literature of the subject In fact the criticism that we find as teachers of the text books which have been offered to us is that they seem to attempt to produce something new in the way of teaching argumentation We believe that it is extremely improbable that anyone in this twentieth century will discover new principles

of dealing with this subject the teaching of which was an old story long before the Christian era About the Publisher
