Committee on Oceanography,1961 Excerpt from A Review of Oceanography 1960 to 1970 And Comments on the Interagency Committee on Oceanography Fiscal Year 1962 Program We agree with and reemphasize the statement in the ico Report that the education of young scientists is the most important part of our long range national program The situation is improving Oceanography departments in universities report a distinct increase in student interest in the last two years amounting in some cases to a flood of applicants This is almost certainly due to the increased public interest in oceanography and to better financial support for the field It has been possible to increase

the enrollment of well qualified candidates some 50 100% in those institutions having the necessary space and funds Other institutions have been unable to increase their graduate student bodies in spite of increases in the number of applicants because of lack of space or funds for support Those institutions which have increased their student bodies can go no further because of lack of space There has been a tendency in the last two years to liberalize policies for granting federal aid to oceanographic education Some agencies now make grants providing direct support for thesis research To a limited degree training grants have been made available through the National Science Foundation and the Department of Health Education and Welfare The Office of Naval Research contract research program continues to provide a most valuable source of support for graduate research assistantships By general support of basic research institutions our country has developed a stable and beneficial atmosphere for long range research programs in which graduate students can be supported Ford Foundation fellowships totalling about one million dollars also have become available to some oceanographic institutions About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
