Ecologies of Learning: An Edited Volume on Sustainability in Education 2025 Editor:1 DR. DIVYA SHARMA Editor:2 DR. SHALINI VERMA Editor:3 DR. SUMITA SINGH 4. DR. PUSHPA SHARMA, PREFACE As humanity confronts unprecedented ecological challenges, education emerges as both a beacon of hope and a catalyst for change. *Ecologies of Learning: An Edited Volume on Sustainability in Education* brings together diverse perspectives, empirical insights, and practical strategies to reimagine how schools, universities, and learning communities can nurture environmental stewardship and social equity. This volume transcends traditional pedagogies by framing sustainability not merely as content to be covered but as a lens through which every aspect of teaching and learning is reexamined. The fifteen chapters chart a comprehensive trajectory from foundational theories of environmental pedagogy to cutting-edge innovations that will shape classrooms of 2030 and beyond. We begin with core principles (Chapter 1) and curriculum design frameworks (Chapter 2) that establish eco-literacy as a dynamic interdisciplinary endeavour. Subsequent chapters delve into place-based models (Chapter 3), the integration of Indigenous knowledge systems (Chapter 4), and STEM approaches that align scientific inquiry with planetary stewardship (Chapter 5). Recognizing the power of the arts to convey complex ecological narratives (Chapter 6), the volume explores arts-based methodologies that cultivate empathy and systems thinking. Experiential fieldwork (Chapter 7) and digital tools (Chapter 8) offer complementary avenues for learners to engage both physically and virtually with environmental issues, while Chapter 9 presents assessment strategies designed to capture real-world impact and behavioural change. Preparing educators

themselves for this change in basic assumptions Chapter 10 outlines transformative approaches to teacher training and Chapter 11 addresses equity and access to ensure that eco pedagogy benefits all learners Chapters 12 and 13 bridge theory and policy highlighting effective school community partnerships and the frameworks needed to sustain green schools at scale Building on these foundations Chapter 14 presents case studies from urban and rural settings illustrating contextualized practices that empower learners as change agents Finally Chapter 15 looks forward spotlighting innovations from AI driven eco analytics to regenerative campus designs that promise to redefine sustainability education in the coming decade This edited volume is intended for educators administrators policymakers curriculum developers and all who believe that education must rise to meet the imperatives of climate resilience and social justice By weaving together scholarship praxis and visionary design *Ecologies of Learning* offers a roadmap for transforming classrooms into living ecosystems of inquiry action and regeneration We hope these chapters inspire you to cultivate learning environments where knowledge and innovation converge to heal restore and safeguard our shared planet Editors Dr Divya Sharma Dr Shalini Verma Dr Sumita Singh
