Enterprise Architecture Frameworks Kompendium, 2011 **Advances in Conceptual Modeling** Carson Woo, Jiaheng Lu, Zhanhuai Li, Tok Wang Ling, Guoliang Li, Mong Li Lee, 2018-10-12 This book constitutes the refereed proceedings of five workshops symposia held at the 37th International Conference on Conceptual Modeling ER 2018 in Xi'an, China, in October 2018. The 42 papers promote and disseminate research on theories of concepts underlying conceptual modeling methods and tools for developing and communicating conceptual models, techniques for transforming conceptual models into effective implementations, and the impact of conceptual modeling techniques on databases, business strategies, and information systems. The following workshops are included in this volume: Emp ER Empirical Methods in Conceptual Modeling, MoBiD Modeling and Management of Big Data, MREBA Conceptual Modeling in Requirements and Business Analysis, QMMQ Quality of Models and Models of Quality, SCME Conceptual Modeling Education. *The Practice of Enterprise Modeling* Geert Poels, Frederik Gailly, Estefania Serral Asensio, Monique Snoeck, 2017-11-14 This volume constitutes the proceedings of the 10th IFIP WG 8.1 Conference on the Practice of Enterprise Modeling held in November 2017 in Leuven, Belgium. The conference was created by the International Federation for Information Processing (IFIP) Working Group 8.1 to offer a forum for knowledge transfer and experience sharing between the academic and practitioner communities. The 20 full papers and 4 short papers accepted were carefully reviewed and selected from 70 submissions. They include research results, practitioner experience reports, and work in progress papers and were presented in 8 sessions covering diverse topics related to enterprise modelling and its application in practice. **The Composable Enterprise: Agile, Flexible, Innovative** August-Wilhelm Scheer, 2023-11-09 The benefits of digitalisation do not lie in the use of new technologies for existing processes but in organisational changes and new business models. The book highlights the composable enterprise as the guiding principle for successful digital transformation and associated cost reductions and revenue increases. What does it mean? A composable enterprise is organised in a decentralised, process-oriented way. This allows the enterprise to react quickly to new situations, develop or change processes and business models. The information systems are based on platform architectures. A paradigm shift to monolithic applications. Sector concepts for industry consulting and universities show how organisation and application architectures interlock in the composable enterprise. The reader receives inspiration, a foundation, and a compass for the digital transformation of a company to the composable enterprise. **Electronic Participation** Efthimios Tambouris, Panos Panagiotopoulos, Øystein Sæbø, Maria A. Wimmer, Theresa A. Pardo, Yannis Charalabidis, Delfina Sá Soares, Tomasz Janowski, 2016-08-10 This book constitutes the refereed proceedings of the 8th IFIP WG 8.5 International Conference on Electronic Participation ePart 2016 held in Guimarães, Portugal, in September 5-8, 2016. The 14 revised full papers presented were carefully reviewed and selected from 31 submissions. The papers reflect completed multi-disciplinary research ranging from policy analysis and conceptual modeling

to programming and visualization of simulation models They are organized in four topical threads theoretical foundations critical reflections implementations policy formulation and modeling

Enterprise Architecture Frameworks Usage Tyler Cross Mincemoyer, 2011

Complex Enterprise Architecture John D. McDowall, 2019-02-07

Implement successful and cost effective enterprise architecture projects This book provides a new approach to developing enterprise architecture based on the idea of emergent behaviors where instead of micromanaging system implementation the enterprise architecture effort establishes clear goals and leaves the details to the implementation teams System development efforts are measured based on their contribution to achieving business goals instead of implementing specific possibly outdated requirements Most enterprise architecture initiatives employ one of the existing system architecture frameworks such as Zachman or The Open Group Architecture Framework but these are not well suited for enterprise architecture in a modern agile organization The new approach presented in this book is based on the author's experience with large enterprise architecture efforts The approach leverages research into complex adaptive systems and emergent behaviors where a few simple rules result in complex and efficient enterprise behaviors Simplifying the task of establishing and maintaining the enterprise architecture cuts the costs of building and maintaining the architecture and frees up those resources for more productive pursuits System implementers are given the freedom to rapidly adapt to changing user needs without the blessing of the enterprise modeling priesthood and the architecture is transformed from a static pile of obscure models and documents into an operational framework that can be actively used to manage an enterprise's resources to better achieve business goals The enterprise architect is free to stop focusing on building and maintaining models and start focusing on achieving business goals What You'll Learn Refocus enterprise architecture on business needs by eliminating most of the enterprise level models Delegate tasks to the development teams who do system implementation Document business goals establish strategies for achieving those goals and measure progress toward those goals Measure the results and gauge whether the enterprise architecture is achieving its goals Utilize appropriate modeling techniques that can be effectively used in an enterprise architecture Who This Book Is For Architecture practitioners and architecture managers Practitioners are experienced architects who have

used existing frameworks such as Zachman and have experience with formal architecture modeling and or model based system engineering managers are responsible for managing an enterprise architecture project and either have experience with enterprise architecture projects that were ineffective or are looking for a different approach that will be more cost effective and allow for more organizational agility Government program managers looking for a different approach to make enterprise architecture more relevant and easier to implement will also find this book of value
