### **Grandparents of Children with Disabilities**

Liora Findler, Orit Taubman - Ben-Ari, 2016-09-27 This briefs offers a comprehensive view of the journey of grandparents of children with disabilities by employing a wide range of theoretical approaches such as intergenerational relationships positive psychology psychoanalytic views and models of stress It presents a multidimensional view of grandparents which begins with the general role of grandparents in the family and the transition to grandparenthood as a major life event The briefs moves on to discuss grandparents roles under unique circumstances such as illness or disability in the family and then deals with perspectives of parents of children with disabilities on the role of grandparents Finally it reviews attitudes of professionals toward grandparents and concludes with suggested intervention strategies for working with families on intergenerational relationships

*Families in Later Life* Lillian Sousa, 2009 This book aims to help provide an understanding of the relationship between the elderly generation and the multigenerational families they belong to through an analysis of family and individual development in later life and a study of the structural and functional complexion of the multigenerational family the basic unit of analysis The increase of life expectancy and the consequent later ageing of the population is making Western families undergo considerable changes The demographic ageing of societies is increasing the number of living generations and decreasing the number of living relatives within these generations These ageing societies are also seeing a changing of some traditional life transitions such as individuals delaying economic independence from parents marriage or long term cohabitation as well as parenting Themes discussed in this book are 1 multigenerational families are now commonplace in the western countries 2 legacies and inheritance are an important theme for the integrity of families in later lives since the increase of welfare states the economic importance of inheritance decreases 3 a substantial proportion of elderly persons and their families live in poverty having to deal with the diminishing of their sensorial and physical capacities as well as lower income and higher medical expenses 4 families have to combine the care giving of elderly

relatives with the care taking of their own children and a professional career 5 counselling becomes an important factor for older adults since many families issue then arise

Marriages and Families Karen Seccombe, Rebecca L. Warner, 2004 In this fresh more structural alternative to other texts for the marriage and family course Seccombe and Warner provide a comprehensive look at close relationships and the family in just 15 chapters Examining close relationships and families by placing them in social context the authors offer a unique emphasis on the structural and relational aspects of the family with a focus on family resilience The text weaves together a macro view social structural analysis of close relationships with the macro an individualist view The authors demonstrate the interaction of theory and methodology in family studies in Chapter 2 and blend cutting edge research and practical applications throughout Among the highlights of this first edition are the exceptionally thorough exploration of the topics of singlehood and cohabitation in Chapter 7 and the unique six chapter core 8 13 that focuses on all aspects of parenthood and the challenges and crises that families face today The authors emphasis on family resilience and how families can be strengthened is reflected in the Constructing Strong Families boxes that appear throughout the text These features encourage students to apply groundbreaking research on what makes a family strong to their own families and in the concluding chapter Looking Ahead Helping Families Flourish which examines the factors that successful families regardless of ethnicity culture or social class consistently exhibit

**Marriages and Families** Mary Ann Schwartz, Barbara Marliene Scott, 2007 Taking an historical cross cultural and global approach this book focuses on the link between social structure and the everyday lives of people s diverse experiences of marriages families and intimate relationships It shows how contemporary families go well beyond the traditional heterosexual two parent white middle class family and heterosexual legally sanctioned marriage challenges the assumption that one culture s way of doing things is the natural or right way shows how marriage and family life have changed historically over time and from place to place and how political and economic globalization impacts families worldwide Features extensive boxed material accompanied by questions for personal reflection

Middle and Late Life Transitions Felix M. Berardo, 1982 The articles in this volume reflect a reorientation in the ways that scientists have viewed human growth and development In this new perspective transitions are viewed as normal situations that are likely to confront anyone Whatever the situation each transition encompasses a bridging period often characterized by feeling of uncertainty and instability During this interval the person engages in various degrees of social

and psychological adaptations to the changing situations in his or her life While such transitional processes have long been characteristic of the human condition it is only in recent years that social and behavioral scientists have begun to rectify out limited knowledge concerning how people and families negotiate a wide array of mid and late life transitions The current preoccupation with the transitions of middle and old age has evolved from several historical economic and demographic changes that have combined to shift our populations toward the middle of the age structure and have produced new stages in the life cycle The result is that today most Americans can expect to pass through these new stages including long term survival the empty nest period universal retirement and an extended term of widowhood in late life characterized by solitary living Many of these changes have in common that they involve periods of imbalance often accompanied by strong emotions Lives must be restructured adaptations made and modifications in both mental and physical behavior must occur The descriptions of these transitions and the process by which adaptations to them are made are the subjects of the articles in this issue

Gender Roles Linda L. Lindsey, 2005 The 4th edition of *Gender Roles* provides the best balance between gender and women as a focus especially with the expanded content on men and masculinity It addresses religion and integrates history at various points An objective of the book is to dispel myths about gender Both sociological and interdisciplinary content organized around clear and appropriate research serves this objective well providing readers with a sociological perspective of gender that can be meaningfully applied to their daily lives The more controversial topics related to gender have a greater array of supporting references directing readers to explore the topics further *Gender Roles* integrates insights and research from other disciplines especially biology psychology anthropology and history Interdisciplinary material is organized presented and guided by the sociological perspective however so readers can understand the commonalities and differences in the ways the various disciplines research and explain gender An exciting and interesting read for anyone interested in gender roles and sexual identity

*Handbook of Family Development and Intervention* William C. Nichols, 2000-02-25 Like all complex living systems a family during its life course proceeds through predictable stages of development Yet every family is different its uniqueness defined and continually redefined by an open ended array of structural biological and sociocultural variables And as with all living things a family's continued well being depends upon its ability to adapt to changes arising from both within the family system and without First postulated in the 1940s these basic ideas constitute the conceptual core of modern family development theory From them has blossomed an impressive body of knowledge about family health and illness without which much of the progress occurring in family therapy over the past half century would not have been possible This book does much to promote continued progress in the practical application of family development theory by affording family therapists an unparalleled opportunity to acquaint themselves with the most important trends in family development theory to emerge over the past decade In it you will find contributions from leading theorists researchers and clinicians arranged so as to provide a systematic treatment of the latest thinking on

family development seen from both the systemic viewpoint and that of individual members of the system Comprehensive in scope this book explores the patterns processes and dynamics inherent in traditional families as well as in important structural variants such as single parent and gay and lesbian families and families with special needs and problems including divorce physical abuse and disabilities Since progress in the social sciences is as much about formulating viable new ways of seeing as it is about determining quantifiable facts the editors offer equal time to an array of influential and sometimes radically conflicting schools of thought including sociobiology social psychology constructionism multiculturalism postmodernism and feminism Mainstream family therapists will find much in this handbook that they will consider controversial In some cases readers may even be outraged by the views expressed Yet thanks to the high caliber of scholarship intellect and professionalism evidenced throughout none of the ideas advanced in Handbook of Family Development and Intervention can be easily dismissed and all have something of value to offer the thoughtful dedicated family therapist Handbook of Family Development and Intervention is a valuable professional resource for all couples and family therapists It is also must reading for graduate students in family psychology family therapy social work and counseling In this magnificent volume the editors make a major contribution that integrates individual and family development concepts and therapeutic applications by bringing together scholarly yet fresh contributions The inclusion of various family forms and of families with special needs makes this volume especially relevant to the treatment of contemporary families as we enter the new millennium This superb Handbook should be mandatory reading and an excellent reference for teachers researchers and therapists at all levels of development Celia J Falicov PhD President 1999 2001 American Family Therapy Academy

**Transition from School to Adult Life** Frank R. Rusch,1992      Biographical Research Methods Robert Lee Miller,2005

*The Need for Theory* Simon Biggs,Ariela Lowenstein,Jon Hendricks,2003 The Need for Theory speaks to the burgeoning need for critical thinking in social gerontology The editors have brought together some of the foremost contributors to theoretical advances in the field This volume incorporates state of the art theorizing with a focus on selected topical areas facing gerontologists around the world Using their keen insights into substantive issues the contributors examine personal and structural changes affecting individuals over the life course Extolling the heed for theory is not enough the contributors focus their insights on a panoply of substantive issues linking the personal with the political and with the structural parameters that shape the process of aging no matter where it occurs      **Abnormal Psychology, 5th Ed** Thomas F.

Oltmanns,2006-04      *Family in Transition* Arlene S. Skolnick,Jerome H.
