Danijela Gasevic, Leah Okenwa Emegwa, Sheikh Alif, 2023-01-30 The Economics of Talent Management and Human Capital Rana, Sharif Uddin Ahmed, Cheok, Adrian David, 2024-11-01

The Economics of Talent Management and Human Capital is an academic book that offers a comprehensive overview of the concept of talent and its relationship with human capital and creativity. Written by leading experts in the field, the book highlights the shift in the US economy towards valuing talent, resulting in growing income inequality. The book proposes critical steps to address this issue: talent acquisition departments must lower expectations and practice self-discipline; investors should prioritize value creation over short-term gains; and the government must regulate the relationship between hedge funds and pension funds, tax carried interest as ordinary income, and revisit the overall tax structure. One of the book's unique contributions is its interdisciplinary approach, bringing together insights from economics, psychology, sociology, and management. This approach makes the book relevant for researchers and practitioners in a range of fields. This book serves as a guiding influence for policy and practice. It provides valuable insights into talent management and human capital and is essential reading for academics, policymakers, business leaders, and anyone interested in the future of work and economic development.

First-Generation Student Experiences in Higher Education Carl E. James, Leanne E. Taylor, 2022-10-11

In First Generation Student Experiences in Higher Education Counterstories we meet eight students who attended university through an access program and hear their stories of deciding to enter university, navigating and negotiating the institution, and bringing their university experiences with them into adult life. Their counterstories, drawn from application statements, weekly group meetings, diary entries, group conversations, interviews, and media reports, challenge the stereotypes commonly applied to marginalized students in higher education. Chapters offer insights into a range of salient themes and highlight the students' strategies, challenges, successes, and trajectories, as well as their nuanced relationships with their networks, communities, families, and significant others. With this volume, James and Taylor present a valuable resource for educators, administrators, scholars, students, and community agencies interested in extending understandings of first-generation university students.
