## **Falling In Love With Hominids:**

Falling in Love with Hominids Nalo Hopkinson, 2015-07-20 An alluring new collection from the author of the New York Times Notable Book *Midnight Robber* Nalo Hopkinson *Brown Girl in the Ring* *The Salt Roads* *Sister Mine* is an internationally beloved storyteller Hailed by the Los Angeles Times as having an imagination that most of us would kill for her Afro Caribbean Canadian and American influences shine in truly unique stories that are filled with striking imagery unlikely beauty and delightful strangeness In this long awaited collection Hopkinson continues to expand the boundaries of culture and imagination Whether she is retelling *The Tempest* as a new Caribbean myth filling a shopping mall with unfulfilled ghosts or herding chickens that occasionally breathe fire Hopkinson continues to create bold fiction that transcends boundaries and borders

**Magill's Guide to Science Fiction and Fantasy Literature: Lest darkness fall**, 1996 These four volumes cover 791 books or series 238 of them published during the 1980s and 1990s the entries are 1 000 words long for single books and 1 500 for series with a one sentence summary beginning each entry followed by bibliographical information Volume 4 contains an extensive bibliography of critical works on science fiction and fantasy a list of major award winners a genre index Booklist

**Talking Book Topics**, 2016 **Early Hominid Activities at Olduvai** Richard Potts, 2017-07-28 The earliest sites at Olduvai Gorge in Tanzania are among the best documented and most important for studies of human evolution This book investigates the behavior of hominids at Olduvai using data of stone tools and animal bones as well as the results of work in taphonomy how animals become fossils the behavior of mammals and a wide range of ecological theory and data By illustrating the ways in which modern and prehistoric evidence is used in making interpretations the author guides the reader through the geological ecological and archeological areas involved in the study of humans Based on his study of the Olduvai excavations animal life and stone tools the author carefully examines conventional views and proposals about the early Olduvai sites First the evidence of site geology tool cut marks and other clues to the formation of the Olduvai sites are explored On this basis the large mammal communities in which early hominids lived are investigated using methods which compare sites produced mainly by hominids with others made by carnivores Questions about hominid hunting scavenging and the importance of eating meat are then scrutinized The leading alternative positions on each issue are discussed providing a basis for understanding some of the most contentious debates in paleo anthropology today The dominant interpretive model for the artifact and bone accumulations at Olduvai and other Plio Pleistocene sites has been that they represent home bases social foci similar to the campsites of hunter gatherers Based on paleo ecological evidence and ecological models the author critically analyzes the home base interpretation and proposes alternative views A new view of the Olduvai sites that they represent stone caches where hominids processed carcasses for food is shown to have important implications for our understanding of hominid social behavior and evolution **The**

**Strange Case of the Rickety Cossack** Ian Tattersall, 2015-06-09 In his new book *The Strange Case of the Rickety Cossack*

human paleoanthropologist Ian Tattersall argues that a long tradition of human exceptionalism in paleoanthropology has distorted the picture of human evolution Drawing partly on his own career from young scientist in awe of his elders to crotchety elder statesman Tattersall offers an idiosyncratic look at the competitive world of paleoanthropology beginning with Charles Darwin 150 years ago and continuing through the Leakey dynasty in Africa and concluding with the latest astonishing findings in the Caucasus The book's title refers to the 1856 discovery of a clearly very old skull cap in Germany's Neander Valley The possessor had a brain as large as a modern human but a heavy low braincase with a prominent brow ridge Scientists tried hard to explain away the inconvenient possibility that this was not actually our direct relative One extreme interpretation suggested that the preserved leg bones were curved by both rickets and by a life on horseback The pain of the unfortunate individual's affliction had caused him to chronically furrow his brow in agony leading to the excessive development of bone above the eye sockets The subsequent history of human evolutionary studies is full of similarly fanciful interpretations With tact and humor Tattersall concludes that we are not the perfected products of natural processes but instead the result of substantial doses of random happenstance

#### **Integrative Paths to the Past** Robert S.

Corruccini, Russell L. Ciochon, 1994 A multidisciplinary overview of the entire field of evolutionary studies written to honor the trailblazing paleoanthropologist F Clark Howell and his interdisciplinary view of the search for human origins *From Lucy to Language* Donald C. Johanson, Blake Edgar, 1996 Now revised and updated this groundbreaking volume by one of the world's foremost paleontologists presents the most complete visual proof ever assembled of the evidence for human evolution displaying in full color all the key fossils and artifacts of human prehistory

#### **Why Machines Will Never Rule the World**

Jobst Landgrebe, Barry Smith, 2025-04-30 This is a revised and expanded second edition of *Why Machines Will Never Rule the World* Its core argument remains the same that an artificial intelligence AI that could equal or exceed human intelligence sometimes called artificial general intelligence AGI is for mathematical reasons impossible It offers two specific reasons for this claim Human intelligence is a capability of the human brain and central nervous system which is a complex dynamic system Systems of this sort cannot be modelled mathematically in a way that allows them to operate inside a computer In supporting their claim the authors Jobst Landgrebe and Barry Smith marshal evidence from mathematics physics computer science philosophy linguistics biology and anthropology setting up their book around three central questions What are the essential marks of human intelligence What is it that researchers try to do when they attempt to achieve Artificial Intelligence AI And why after more than 50 years are our interactions with AI for example when on the telephone with our bank's computers still so unsatisfactory The first edition was published the same week that ChatGPT was unleashed onto the world This second edition shows how the arguments in the book apply already to Large Language Models such as ChatGPT This new edition also brings up to date the arguments relating to the limits of AI showing why AI systems are best viewed as pieces of mathematics which cannot think feel or will They also demolish the idea that with the help of AI we could solve

physics in a way that would allow us to create in the cloud a perfect simulation of reality in which we could enjoy digital immortality Such ideas reveal a lack of understanding of physics mathematics human biology and computers There is still as the authors demonstrate in an updated final chapter a great deal that AI can achieve which will benefit humanity But these benefits will be achieved without the aid of systems that are more powerful than humans which are as impossible as AI systems that are intrinsically evil or able to will a takeover of human society Key Changes to the Second Edition Shows how the arguments of the first edition apply also to new Large Language Models Adds a treatment of human practical intelligence of knowing how vs knowing that a topic that is ignored by the AI community Demonstrates why AI ethics should be relabelled as ethics of human uses of AI Adds a new chapter showing the essential limitations of physics providing a thorough grounding for the arguments of the book Demolishes the idea that we might already be living in a simulation

**Human Body Size and the Laws of Scaling** Thomas T. Samaras, 2007 Several books have been published on scaling in biology and its ramifications in the animal kingdom However none has specifically examined the multifaceted effects of how changes in human height create disproportionately larger changes in weight surface area strength and other physiological parameters Yet the impact of these non linear effects on individual humans as well as our world's environment is enormous Since increasing human body size has widespread ramifications this book presents findings on the human species and its ecological niche its community and how the species interacts with its environment Thus a few chapters provide an ecological overview of how increasing human body size relates to human evolution fitness health survival and the environment This book provides a unique purview of the laws of scaling on human performance health longevity and the environment Numerous examples from various research disciplines are used to illustrate the impact of increasing body size on many aspects of human enterprises including work output athletics and intellectual performance

**Hominid Evolution and Community Ecology** Robert Foley, 1984 *College of Science Record*, 1968 *Hominid Origins* Kathleen J. Reichs, 1983 **Signs of the Flesh** Daniel Rancour-Laferriere, 1992 **Perspectives on Human Evolution** Sherwood Larned Washburn, Phyllis Dolhinow, 1968

**Nutritional Health** Ted Wilson, Norman J. Temple, 2001-02-23 An authoritative and comprehensive collection of cutting edge reviews by leading authorities detailing the scientific evidence for the health effects of vitamins minerals functional foods and other classes of foods The authors provide readers with updated recommendations on a wide range of significant nutritional questions including the cardiovascular effects of homocysteine and dietary fats the importance of antioxidants and soy isoflavones with respect to heart disease and cancer and the use of dietary modifications in the prevention and or treatment of blood pressure obesity diabetes and osteoporosis Richly insightful and up to date Nutritional Health Strategies for Disease Prevention offers sound advice on optimizing our nutritional habits as well as a valuable guide to the growing body of literature that shows how nutritional interventions have become essential to reducing the risk of chronic disease
