**Kinship in the Fiction of N. K. Jemisin** Berit Åström, Jenny Bonnevier, 2023-01-24 Kinship in the Fiction of N K Jemisin Relations of Power and Resistance examines the work of N K Jemisin through the lens of critical kinship studies In a world increasingly suffering the effects of climate change currently undergoing a sixth mass extinction and where anti democratic racist and misogynist movements are gaining ground in many societies there is an urgent need to re imagine our most intimate relations and the webs of kinship that form our societies but also connect us to the more than human world The essays in this collection shed new light on the ways in which Jemisin's fiction does such re imaginative work and explores both the contemporary moment and the potential for a future that is other than our present

**Virginia Woolf and the Age of Listening | Virginia Woolf à l'ère de l'écoute** Adèle Cassigneul, Anne-Marie Smith-Di Biasio, 2025-04-24 Listening was the spirit of the age as the invention of psychoanalysis and of radio marked the turn of the twentieth century Virginia Woolf and the Age of Listening brings together contributions which tune into that acoustic quality at once present in Woolf's time in her texts and in the readings which here echo those very listening techniques Indeed the listening mind as a reading surface for the receptivity and reconstruction of sound waves embodies a shift which informs the thinking of many chapters in this volume In their attention to listeners in the text and to those who make up the work of reception in both English and French these readings consider Woolf's oeuvre as an echo chamber reverberating with intertextual echoes in a multi layered representational network They form a constellation of

answers to the call of the Age of Listening

### **Visual Dysfunction in Schizophrenia: A View into the Mechanisms of**

**Madness?** Randolph Blake, Steven Silverstein, Brian P. Keane, Michael Green, Szabolcs Kéri, 2015-05-11 Research on visual perception in schizophrenia has a long history. However, it is only recently that it has been included in mainstream efforts to understand the cognitive neuroscience of the disorder and to assist with biomarker and treatment development, e.g., the NIMH CNTRICS and RDoC initiatives. Advances in our understanding of visual disturbances in schizophrenia can tell us about both specific computational and neurobiological abnormalities and about the widespread computational and neurobiological abnormalities in the illness of which visual disturbances constitute well studied replicable low level examples. Importantly, far from being a passive sensory registration process, visual perception is active, inferential, and hypothesis generating, and therefore can provide excellent examples of breakdowns in general brain functions in schizophrenia. Despite progress made in understanding visual processing disturbances in schizophrenia, many challenges exist, and many unexplored areas are in need of examination. For example, the directional relationships between perceptual and cognitive disturbances, e.g., in attention, memory, executive function, predictive coding, remain unclear in many cases, as do links with symptoms including visual hallucinations. The effect of specific visual disturbances on multisensory integration in schizophrenia has also not been explored. In addition, few studies of vision in schizophrenia have used naturalistic stimuli including real world objects, and almost no studies have examined processing during interaction with objects or visual exploration, which can provide important data on functioning of the perception for action pathway. Relatedly, studies of visual processing in schizophrenia have also not been conducted within contexts that include emotional stimulation and the presence of reinforcers, characteristics of many real world situations, and the consequences of this are likely to be an incomplete view of how and when perception is abnormal in the condition. An additional important area involves treatment of visual disturbances in schizophrenia. Two major questions regarding this are: 1) can visual processing be improved in cases where it is impaired, and by what types of interventions affecting which cognitive and neurobiological mechanisms; and 2) what are the clinical and functional benefits of improving specific visual functions in people with schizophrenia. Other important and understudied questions concern: 1) the extent to which indices of visual functioning can serve as biomarkers, such as predictors of relapse, treatment response, and/or recovery; 2) the potential role of visual functioning in diagnosing and predicting illness; 3) the extent to which some visual perception disturbances are diagnostically specific to schizophrenia; and 4) the extent to which visual disturbances are truly manifestations of disease, as opposed to aspects of normal variation that, in combination with disease, serves to modify the clinical presentation. This Frontiers Research Topic explores some of these and other issues facing this exciting interface between vision science and schizophrenia research. We include papers that span the entire range of different Frontiers paper types, including those that are data driven, using psychophysics, electroencephalography, neuroimaging, computational, and animal models, and other methods, reviews, hypotheses, theories, opinion, methods, areas of

Michael, the Duke of Hadlow, has the liberty of enjoying an indiscretion or several. But when it comes time for him to take a proper bride, he ultimately realizes he wants only one woman: Edwina Cheltam. He'd hired her as his secretary only to quickly discover she was sensuous and intelligent. They embark on a passionate affair, and when she breaks it off, he accepts her decision as the logical one but only at first. Then he decides to pursue her. Michael is brilliant, single-minded, and utterly indifferent to being the talk of the ton. It's even said his only true friend is his dog. Edwina had begged him to marry someone appropriate: someone aristocratic, someone high-born, someone else. But the only thing more persuasive than a duke's intent on seduction is one who has fallen irrevocably in love. ***Daring with a Duke*** Lizzie C Koz, 2025-01-14 There's no better revenge than seducing your fiancé's father until you fall in love with him.
