Foreign Language Learning And Use Interaction In Informal Social Networks:

Foreign Language Learning and Use Naomi Kurata, 2012 It is commonly believed that foreign language skills improve through social interaction with speakers of the language However there is little research addressing the issue of access to such interaction This book explores this issue examining longitudinal case studies of interaction between language learners and speakers of the target language within their informal social networks It looks at the complex social and personal factors that influence language choice Kurata reveals that even for motivated learners opportunities to use the target language are limited and suggests factors that promote language use and opportunities for learning She proposes ways around obstacles to opportunities for second language use and second language learning and sets out important implications for language learning in and outside classrooms A central implication is the necessity for educators to increase their awareness about their students self image as an L2 user The book features Japanese as the target language under discussion but the results are widely applicable in other language contexts particularly in English speaking countries Social Networks in Language Learning and Language Teaching Avary Carhill-Poza, Naomi Kurata, 2020-12-10 Sociocultural research has long recognized the necessity of sustained interpersonal interaction for language development However less is known about the underlying relationships that promote language acquisition and their relevance for language classrooms Presenting cutting edge research on social networks and their applications in language teaching this book explores the relationships that mediate language learning in and out of classrooms Highlighting the complexity of language in multilingual contexts chapters engage social network analysis to understand the role of instructional practices socialization motivation language status online communications technology and language policies in the development of social resources for language learning Discussing popular language teaching frameworks such as translanguaging Social Networks in Language Learning and Language Teaching provides a nuanced account of the influences of social context on language learning exploring classroom applications and pointing the way to a robust research agenda *Research Anthology on Applying Social Networking Strategies to Classrooms and Libraries* Management Association, Information Resources, 2022-07-08 The introduction of social media has given many communities the opportunity to connect and communicate with each other at a higher level than ever before Many organizations from businesses to governments have taken advantage of this important tool to conduct research and enhance efficiency Libraries and educational institutions have also made use of social media to enhance educational marketing engage with learning communities adapt educational tools and more The *Research Anthology on Applying Social Networking Strategies to Classrooms and Libraries* describes the applications tools and opportunities provided by the intersection of education and social media It also considers the ways in which social media encourages learner engagement and community participation Covering topics such as data collection online professional learning networks and reinforcement learning this major reference work is a dynamic resource for pre service teachers teacher
