Formal Ontologies Meet Industry Frontiers In Artificial Intelligence And Applications:

Formal Ontologies Meet Industry R. Ferrario, A. Oltramari, 2009-08-21 A collection of papers addressing the multi shaped character of knowledge studies and applications in the field of ontology and semantic technology Formal Ontologies Meet Industry S. Borgo, 2008 The success of the methodologies associated with knowledge modeling and ontologies led to increased need of a comparison between different approaches and results This book focuses on ontology in relation to business enterprise enterprise knowledge practice and linguistics **Applications of Cognitive Work Analysis** Ann M. Bisantz, Catherine M. Burns, 2016-04-19 Despite continued interest in Cognitive Work Analysis CWA techniques for the analysis and design of complex human technology systems few published accounts exist that document all of the five recommended phases of CWA in real world applications Delineating a work centered conceptual framework that guides the design of technology Applications *Legal Knowledge and Information Systems* Foundation for Legal Knowledge Systems, 2009 The 22nd edition of the JURIX conference was held in Rotterdam on the 17th and 18th December and was hosted by the Erasmus University Rotterdam While the conference was back to its country of origin JURIX continues to attract a wide international audience This year the conference received submissions from all five continents This clearly demonstrates the lively and growing interest for the highly interdisciplinary discipline of legal informatics The selection of papers for this edition of JURIX covers a wide variety of topics in legal informatics including contributions on established fields such as legal document management argumentation case based reasoning dispute resolution support for legal drafting and ontologies to emerging areas such as regulatory compliance normative multi agent systems and game theory as well as application areas for example fraud detection legal tutoring systems and legal decision support systems Information Modelling and Knowledge Bases XXI Tatjana Welzer Družovec, Hannu Jaakkola, Yasushi Kiyoki, Takehiro Tokuda, Naofumi Yoshida, 2010 Information modelling and knowledge bases have become crucially important subjects in the last few decades They continue to be increasingly relevant not only in academic communities but in every area of commerce and society where information technology *Societal Challenges and Geoinformatics* A. Krishna Sinha, 2011 *Conditional and Preferential Logics* Gian Luca Pozzato, 2010 Revised and updated version of the author's Ph D dissertation University of Torino

Adaptive Stream Mining Albert Bifet, 2010 This book is a significant contribution to the subject of mining time changing data streams and addresses the design of learning algorithms for this purpose It introduces new contributions on several different aspects of the problem identifying research opportunities and increasing the scope for applications It also includes an in depth study of stream mining and a theoretical analysis of proposed methods and algorithms The first section is concerned with the use of an adaptive sliding window algorithm ADWIN Since this has rigorous performance guarantees using it in place of counters or accumulators it offers the possibility of extending such guarantees to learning and mining algorithms not initially designed for drifting data Testing with several methods including Na ve Bayes clustering decision

trees and ensemble methods is discussed as well The second part of the book describes a formal study of connected acyclic graphs or trees from the point of view of closure based mining presenting efficient algorithms for subtree testing and for mining ordered and unordered frequent closed trees Lastly a general methodology to identify closed patterns in a data stream is outlined This is applied to develop an incremental method a sliding window based method and a method that mines closed trees adaptively from data streams These are used to introduce classification methods for tree data streams

Proceedings of the ... ASME Design Engineering Technical Conferences, 2006 **Memoirs of the Institute of Scientific and Industrial Research, Osaka University** Ōsaka Daigaku. Sangyō Kagaku Kenkyūjo, 2010 Special Papers, 1934 Formal Ontologies Meet Industry Roberta Cuel, Robert Young, 2015-07-24 This book constitutes the proceedings of the 7th International Formal Ontologies Meet Industries Workshop held in Berlin Germany in August 2015 The 11 full research papers accepted for FOMI 2015 were selected from 18 submissions The papers focus on theoretical studies of formal ontologies committed to provide a sound basis for industrial applications and to allow formal representation of corporate knowledge and on business experiences in case studies that single out concrete problems and possible solutions in the creation and deployment of formal ontologies Overall they provide valuable insights into the current state of progress in supporting industrial information and knowledge sharing through the development of formal ontologies **Formal Ontologies Meet Industry** Pieter E. Vermaas, Virginia Dignum, 2011 Knowledge modeling and the semantic dimension of information plays an increasingly central role in the network economy today Theoretical research and actual implementations bring up unexpected problems and issues and there is moreover an increasing need for solid theoretical foundations for practical applications of ontologies based on philosophy linguistics artificial intelligence and logic Formal Ontology in Information Systems Maureen Donnelly, Giancarlo Guizzardi, 2012 The complex information systems which have evolved in recent decades rely on robust and coherent representations in order to function Such representations and associated reasoning techniques constitute the modern discipline of formal ontology which is now applied to fields such as artificial intelligence computational linguistics bioinformatics GIS conceptual modeling knowledge engineering information retrieval and the semantic web Ontologies are increasingly employed in a number of complex real world application domains For instance in biology and medicine more and more principle based ontologies are being developed for the description of biological and biomedical phenomena To be effective such ontologies must work well together and as they become more widely used achieving coordinated development presents a significant challenge This book presents collected articles from the 7th International Conference on Formal Ontologies FOIS held in Graz Austria in July 2012 FOIS is a forum which brings together representatives of all major communities involved in the development and application of ontologies to explore both theoretical issues and concrete applications in the field The book is organized in eight sections each of which deals with the ontological aspects of bioinformatics physical entities artifacts and human resources ontology evaluation language and social

relations time and events representation and the methodological aspects of ontological engineering Providing a current overview of developments in formal ontology this book will be of interest to all those whose work involves the application of ontologies and to anybody wishing to keep abreast of advances in the field **Formal Ontology in Information Systems**

Nathalie Aussenac-Gilles, Torsten Hahmann, Antony Galton, 2024-01-15 FOIS is the flagship conference of the International Association for Ontology and its Applications a non profit organization which promotes interdisciplinary research and international collaboration at the intersection of philosophical ontology linguistics logic cognitive science and computer science This book presents the papers delivered at FOIS 2023 the 13th edition of the Formal Ontology in Information Systems conference The event was held as a sequentially hybrid event face to face in Sherbrooke Canada from 17 to 20 July 2023 and online from 18 to 20 September 2023 In total 62 articles from 19 different countries were submitted out of which 25 were accepted for inclusion in the conference and for publication corresponding to an acceptance rate of 40 percent The contributions are separated into the book s three sections 1 Foundational ontological issues 2 Methodological issues around the development alignment verification and use of ontologies and 3 Domain ontologies and ontology based applications In these sections ontological aspects from a wide variety of fields are covered primarily from various engineering domains including cybersecurity manufacturing petroleum engineering and robotics but also extending to the humanities social sciences medicine and dentistry A noticeable trend among the contributions in this edition of the conference is the recognition that improving the tools to analyze align and improve ontologies is of paramount importance in continuing to advance the field of formal ontology The book will be of interest to all formal and applied ontology researchers and to those who use formal ontologies and information systems as part of their work **Formal Ontology in Information Systems**

Brandon Bennett, Christiane Fellbaum, 2006 Aims to provide a forum for genuine interdisciplinary exchange in the spirit of a unified effort towards solving the problems of ontology with an eye to both theoretical issues and concrete applications This book contains a range of areas all of which are important to the development of formal ontologies **Formal Ontology in Information Systems**

Boyan Brodaric, Fabian Neuhaus, 2020-11-15 FOIS is the flagship conference of the International Association for Ontology and its Applications a non profit organization which promotes interdisciplinary research and international collaboration at the intersection of philosophical ontology linguistics logic cognitive science and computer science as well as in the applications of ontological analysis to conceptual modeling knowledge engineering knowledge management information systems development library and information science scientific research and semantic technologies in general This volume presents the 17 papers accepted for the 11th Formal Ontology in Information Systems conference FOIS 2020 These papers cover a broad range of topics and are organized into 5 groups Foundations is dedicated to the general ontological decisions providing a foundation for any ontology both from a philosophical perspective and with an emphasis on applications Social Entities is dedicated to the ontological analysis and formalization of various social entities

including secrets legal theories decisions kinship and cultural heritage The papers in Intentionality and Embodiment analyze aspects of an agent's intentions beliefs and desires as well as the embodiment of functional relations The section on Parts and Wholes is dedicated to mereology as well as the mereological analysis of certain types of entities e.g. pluralities information entities and computer programs Lastly the papers in Methods are about ontology evaluation and use Altogether the papers reflect traditional FOIS themes with perhaps a greater emphasis on social and agent aspects and will be of interest to all those whose work involves ontology and its applications
