Fatigue Handbook Offshore Steel Structures:

Fatigue Handbook A. Almar-Naess, 1985 Soon after oil and gas exploration and production began in the North Sea in the 1960s it became apparent that the steel structure design developed for offshore activities in the Gulf of Mexico was not adequate when transferred to the rigorous North Sea environment Realizing the great need for a better understanding of the fatigue phenomenon concerned materials scientists at SINTEF and Det norske Veritas prepared a five year programme for intensified research on fatigue of offshore steel structures It became the National Five Year Programme for Fatigue of Offshore Steel Structures in 1981 This text comprises a study of fatigue in offshore steel structures It seeks to make results in the area available in a form that can be utilized and understood by those responsible for the different stages in engineering design fabrication and service of offshore structures

Tubular Structures Paul Grundy, Alan Holgate, Bill Wong, 2021-10-06 Tubular structures remain a source of architectural inspiration and practical solutions to difficult performance specifications New developments are covered in this text which contains papers on design innovations and applications presented at an international symposium held in Australia in 1994
