Feature Writing For Newspapers And Magazines The Pursuit Of Excellence 4th Edition:

The Routledge Handbook of Magazine Research David Abrahamson, Marcia R. Prior-Miller, 2015-06-05 Scholarly engagement with the magazine form has in the last two decades produced a substantial amount of valuable research. Authored by leading academic authorities in the study of magazines, the chapters in *The Routledge Handbook of Magazine Research* not only create an architecture to organize and archive the developing field of magazine research but also suggest new avenues of future investigation. Each of 33 chapters surveys the last 20 years of scholarship in its subject area, identifying the major research themes, theoretical developments, and interpretive breakthroughs. Exploration of the digital challenges and opportunities which currently face the magazine world are woven throughout, offering readers a deeper understanding of the magazine form as well as of the sociocultural realities it both mirrors and influences. The book includes six sections: Methodologies and structures, presents theories and models for magazine research in an evolving global context; Magazine publishing, the people and the work, introduces the roles and practices of those involved in the editorial and business sides of magazine publishing; Magazines as textual communication, surveys the field of contemporary magazines across a range of theoretical perspectives; subjects, genre, and format, questions Magazines as visual communication, explores cover design, photography, illustrations, and interactivity; Pedagogical and curricular perspectives, offers insights on undergraduate and graduate teaching topics in magazine research; The future of the magazine form, speculates on the changing nature of magazine research via its environmental effects, audience, and transforming platforms. Fearless Editing Tim Pilgrim, Carolyn Dale, 2017-09-29 *Fearless Editing* clearly articulates the basic concepts underlying editing techniques and demonstrates their application for newspapers, public relations, magazines, and Web pages. This text takes a conceptual approach that integrates verbal skills with visual elements. Unlike other texts that are clearly designed for print, this book includes multi-media applications in every chapter. **MediaWriting** W. Richard Whitaker, Janet E. Ramsey, Ronald D. Smith, 2009-01-13 Designed for those preparing to write in the current multimedia environment, *MediaWriting* explores the linkages between print, broadcast, and public relations styles, outlines the nature of good writing, synthesizes and integrates professional skills and concepts. Complete with interesting real-world examples and exercises, this textbook gives students progressive writing activities amid an environment for developing research and interviewing skills. Starting from a basis in writing news and features for print media, it moves on to writing for broadcast news media, then introduces students to public relations writing in print, broadcast, and digital media, as well as for news media and advertising venues. Rather than emphasizing the differences among the three writing styles, this book synthesizes and integrates the three concepts, weaving in basic principles of Internet writing and reporting. This book provides beginning newswriting students with a primer for developing the skills needed for work in the media industry. As such, it is a hands-on writing text for students preparing in all professional areas of communication: journalism, broadcasting, media, and public relations.
