**Material Feminisms: New Directions for Education** Carol Taylor, Gabrielle Iverson, 2018-02-02 Material Feminisms New Directions for Education provides a range of powerful theoretical and innovative methodological examples to illuminate how new material feminism can be put to work in education to open up new avenues of research design and practice It poses challenging questions about the nature of knowledge production the role of the researcher and the critical endeavour arising from inter and post disciplinarity Working with diffractive methodologies and new materialist ecological epistemologies the book offers resources for hope which widen the scope for how educational problems are interrogated and provides a political counter movement to neo positivist outcomes based approaches within education Inspired by writers such as Barad Bennett and Deleuze and Guattari the book makes a radical break with cognitive dualist and universal conceptions of human subjectivity and intelligence in education By taking its starting point as the co constitutiveness of discourse materiality corporeality and place the book foregrounds educational practices as material enactments of multiple non linear entangled affective and relational forces It offers new insights into how gender class and ethnicity are constituted in and by material assemblages that are often submerged or unseen This book is an essential starting place for those intrigued by what new theoretical accounts of materiality posthumanism and affect can offer educational research Diffractive methodologies challenge readers to take a fuller range of actors into account than in objective humanist methodologies and in so doing to pay closer attention to what data is It invites researchers to engage with long standing feminist concerns about power and knowledge production in research processes This book was originally published as a special issue of Gender and Education

Posthuman Research Practices in Education Carol Taylor, Christina Hughes, 2016-04-08 How do we include and develop understandings of those beyond the human aspects of the world in social research Through fifteen contributions from leading

*New Books on Women and Feminism*, 2015 **Feminist Collections**, 2013 [Handbook of Feminist Research](#) Sharlene Nagy

Hesse-Biber, 2007 The topic feminist research has too often been neglected in standard research methods books The Handbook of Feminist Research represents the establishment of a new tradition or paradigm in viewing how the research process is implemented Feminist researchers bring unique epistemological and methodological perspectives to the research process Feminists approach to methodology allows for new types of questions about women s lives and those of other ed marginalized groups to be addressed within their respective fields of research This Handbook stresses the interconnections between epistemology methodology and methods They are not de linked from each other but work together in dynamic ways to produce new knowledge and this openness itself is also characteristic of how feminist researchers approach their work Feminists engage synergistically with all three aspects of the research process epistemology methodology and method Through a synergistic connection between these elements of research epistemology methodology and method we find that feminist research often shapes new research endeavors that are greater than the sum of their parts In other words while traditional research employs these components of research the synergistic engagement of these components in feminist research questions the status quo aiming to raise our consciousness about how we do research Looking at the selections provided in this Handbook we are able to look at feminist research its implementation of synergistic use of epistemology
