Fear Itself The Max Segal Series:

Fear Itself Dan Greenburg, 2014-01-21 Why would a nurse's aide terrified of heights hurl herself from a twentieth story rooftop in Queens? Why would an attractive librarian with a water phobia be found naked and floating facedown in the Astoria Park swimming pool? How did the scantily clad body of a young bookstore clerk with a horror of snakes end up inside a Central Park Zoo cage with a two hundred pound python? NYPD Detective Max Segal, strung out from a devastating divorce, is determined to find the killer before more women die. A sadistic ex-con who masquerades as a shrink is seducing phobic women into psychic hell and literally scaring them to death. When Max Segal picks up the killer's trail, Max's new girlfriend is chosen to become victim number four. Like *Love Kills* and *Exes*, Dan Greenburg's previous bestselling thrillers, *Fear Itself* is a terrifyingly realistic, darkly humorous, startlingly sexy street tough page-turner with a surprising climax. **The Washington**

Post Index, 1989 *Pestilence and the Body Politic in Latin Literature* Hunter H. Gardner, 2019-07-11 Scientists, journalists, novelists, and filmmakers continue to generate narratives of contagion stories shaped by a tradition of disease discourse that extends to early Greco-Roman literature. Lucretius, Vergil, and Ovid developed important conventions of the Western plague narrative as a response to the breakdown of the Roman *res publica* in the mid-first century CE and the reconstitution of stabilized government under the Augustan Principate 31 BCE–14 CE, relying on the metaphoric relationship between the human body and the body politic. These authors used largely fictive representations of epidemic disease to address the collapse of the social order and suggest remedies for its recovery. Theorists such as Susan Sontag and René Girard have observed how the rhetoric of disease frequently signals social, psychological, or political pathologies, but their observations have rarely been applied to Latin literary practices. *Pestilence and the Body Politic in Latin Literature* explores how the origins and spread of outbreaks described by Roman writers enact a drama in which the concerns of the individual must be weighed against those of the collective staged in an environment signalling both reversion to a pre-historic Golden Age and the devastation characteristic of a post-apocalyptic landscape. Such innovations in Latin literature have impacted representations as diverse as Carlo Coppola's paintings of a seventeenth-century outbreak of bubonic plague in Naples and Margaret Atwood's *Maddaddam Trilogy*. Understanding why Latin writers developed these tropes for articulating contagious disease and imbuing them with meaning for the collapse of the Roman body politic allows us to clarify what more recent disease discourses mean both for their creators and for the populations they afflict in contemporary media.
