**Feature Extraction, Construction and Selection** Huan Liu, Hiroshi Motoda, 2012-12-06 There is broad interest in feature extraction construction and selection among practitioners from statistics pattern recognition and data mining to machine learning Data preprocessing is an essential step in the knowledge discovery process for real world applications This book compiles contributions from many leading and active researchers in this growing field and paints a picture of the state of art techniques that can boost the capabilities of many existing data mining tools The objective of this collection is to increase the awareness of the data mining community about the research of feature extraction construction and selection which are currently conducted mainly in isolation This book is part of our endeavor to produce a contemporary overview of modern solutions to create synergy among these seemingly different branches and to pave the way for developing meta systems and novel approaches Even with today s advanced computer technologies discovering knowledge from data can still be fiendishly hard due to the characteristics of the computer generated data Feature extraction construction and selection are a set of techniques that transform and simplify data so as to make data mining tasks easier Feature construction and selection can be viewed as two sides of the representation problem     *Applications of Multi-objective Evolutionary Algorithms* Carlos A. Freitas,2002-08-21 This book integrates two areas of computer science namely data mining and evolutionary algorithms Both these areas have become increasingly popular in the last few years and their integration is currently an active research area In general data mining consists of extracting knowledge from data The motivation for applying evolutionary algorithms to data mining is that evolutionary algorithms are robust search methods which perform a global search in the space of candidate solutions This book emphasizes the importance of discovering comprehensible interesting knowledge which is potentially useful for intelligent decision making The text explains both basic concepts and advanced topics     *Data Mining and Knowledge Discovery* ,2003     **Journal of Management Information Systems** ,2008     **IETE Journal of Research** ,2002     **Data Mining** Mehmed Kantardzic,2003 Data mining describes the often complex and sophisticated tools used in automatic data analysis such as analyzing a customer s previous buying habits This volume emphasizes the selection of appropriate methodologies and data analysis software as well as parameter tuning     **Computing in Civil and Building Engineering** ,2000     *Image and Signal Processing for Remote Sensing* ,2003     Journal of the American Statistical Association ,1999     *Proceedings of the ...
