Manchester UK and University of Rotterdam The Netherlands This book considers how a regulatory enforcement policy should be designed to efficiently induce proactive corporate compliance It first explores two major schools of thought regarding law enforcement both the deterrence and cooperative approaches and shows that neither of these represents an optimal regulatory enforcement paradigm from a social welfare perspective It provides a critical analysis of recent developments in US Federal corporate liability regimes and proposes a generic framework that better tailors sanction schemes and monitoring systems to regulatee performance The proposed framework efficiently induces corporate proactive compliance while maintaining an optimal level of deterrence This insightful book will appeal to academics in law and economics behavioral economics criminology and business as well as to practitioners and policymakers Law and Corporate Behaviour Christopher Hodges, 2015-10-22 This book examines the theories and practice of how to control corporate behaviour through legal techniques The principal theories examined are deterrence economic rational acting responsive regulation and the findings of behavioural psychology Leading examples of the various approaches are given in order to illustrate the models private enforcement of law through litigation in the USA public enforcement of competition law by the European Commission and the recent reform of policies on public enforcement of regulatory law in the United Kingdom Noting that behavioural psychology has as yet had only limited application in legal and regulatory theory the book then analyses various European regulatory structures where behavioural techniques can be seen or could be applied Sectors examined include financial services civil aviation pharmaceuticals and workplace health safety Key findings are that enforcement has to focus on identifying the causes of non compliance so as to be able to support improved performance rather than be based on fear motivating complete compliance Systems in which reporting is essential for safety only function with a no blame culture The book concludes by proposing an holistic model for maximising compliance within large organisations combining public regulatory and criminal controls with internal corporate systems and external influences by stakeholders held together by a unified core of ethical principles Hence the book proposes a new theory of ethical regulation This title is included in Bloomsbury Professional's International Arbitration online service Business and Corporate Integrity Robert C.
