Feminism And Geography The Limits Of Geographical Knowledge:

Feminism & Geography Gillian Rose, 1993 Geography is a subject that throughout its history has been dominated by men men have undertaken the heroic explorations that form the mythology of its foundation men have written most of its texts and as many feminist geographers have remarked men's interests have structured what counts as legitimate geographical knowledge This book offers a sustained examination of the masculinism of contemporary geographical discourses Drawing on the work of feminist theories about the intersection of power knowledge and subjectivity Rose discusses different aspects of the discipline's masculinism in a series of essays that bring influential approaches in recent geography together with feminist accounts of the space of the everyday the notion of a sense of place and views of landscape In the final chapter she examines the spatial imagery of a variety of feminists in order to argue that the geographical imagination implicit in feminist discussions of the politics of location is one example of a geography that does not deny difference in the name of a universal masculinity

Introducing Human Geographies Paul Cloke, Philip Crang, Mark Goodwin, 2013-12-05. *Introducing Human Geographies* is the leading guide to human geography for undergraduate students explaining new thinking on essential topics and discussing exciting developments in the field. This new edition has been thoroughly revised and updated and coverage is extended with new sections devoted to biogeographies, cartographies, mobilities, non-representational geographies, population geographies, public geographies and securities. Presented in three parts with 60 contributions written by expert international researchers, this text addresses the central ideas through which human geographers understand and shape their subject. Part I: Foundations engages students with key ideas that define human geography's subject matter and approaches through critical analyses of dualisms such as local/global, society/space and human/nonhuman. Part II: Themes explores human geography's main sub-disciplines with sections devoted to biogeographies, cartographies, cultural geographies, development geographies, economic geographies, environmental geographies, historical geographies, political geographies, population geographies, social geographies, urban and rural geographies. Finally, Part III: Horizons assesses the latest research in innovative areas from mobilities and securities to non-representational geographies. This comprehensive, stimulating and cutting-edge introduction to the field is richly illustrated throughout with full-colour figures, maps and photos. These are available to download on the companion website located at www.routledge.com/9781444135350.

Key Thinkers on Space and Place Mary Gilmartin, Phil Hubbard, Rob Kitchin, Sue Roberts, 2024-05-11. Space and place are at the heart of how geographers and sociologists think. This updated edition of the essential undergraduate text will introduce you to the most influential thinkers in the tradition of social theory with a new focus on the past fifty years. This book is designed to engage with theoretical debates in human geography through the individuals who have made the most significant contributions to this field. Spatial thought is never developed in a vacuum but is always constructed by individuals and groups of people located in particular institutional and social structures with their own sets of personal and political beliefs. The biographical approach of this book reveals how individual thinkers draw on a rich legacy of ideas from past and contemporary generations. With increased coverage of international and female thinkers as well as those who work against Eurocentric notions of space and place, this book reveals the exciting
