## **Documenting Individual Identity The Development Of State Practices In The Modern World:**

Documenting Individual Identity Jane Caplan, John Torpey, 2018-06-05 This book addresses one of the least studied yet most pervasive aspects of modern life the techniques and mechanisms by which official agencies certify individual identity From passports and identity cards to labor registration and alien documentation from fingerprinting to much debated contemporary issues such as DNA typing body surveillance and the catastrophic results of colonial era identity documentation in postcolonial Rwanda Documenting Individual Identity offers the most comprehensive historical overview of this fascinating topic ever published The nineteen essays in this volume represent the collaborative effort of historians sociologists historians of science political scientists economists and specialists in international relations Together they cover a period from the emergence of systematic practices of written identification in early modern Europe through to the present day and a geographic range that includes Europe the Soviet Union North and South America and Africa While the book is attuned to the nefarious possibilities of states increasing capacity to identify individuals it recognizes that these same techniques also certify citizens eligibility for significant positive rights such as welfare benefits and voting Unprecedented in subject and scope Documenting Individual Identity promises to shape a whole new field of research that crosses disciplinary boundaries and is of broad public and academic significance In addition to the editors the contributors are Valentin Groebner G rard Noiriel Charles Steinwedel Marc Garcelon Jon Agar Martine Kaluszynski Peter Becker Anne Joseph Kristin Ruggiero Andrea Geselle Andreas Fahrmeier Leo Lucassen Pamela Sankar David Lyon Gary Marx Dita Vogel and Timothy Longman

*Reading Faces* Edward Higgs, 2025-10-20 Reading Faces is the first book to discuss the historical contexts and theoretical underpinnings of the artificial intelligence AI systems that identify individuals or purport to ascribe emotions and characteristics to them based on their facial features It examines the direct impact of past research on the development of AI systems the way in which the past provides contexts which have predisposed people to accept outputs of AI systems as common sense how the role of politics and the changing nature of the state have led to the introduction of AI systems and their precursors how previous technologies led to the acceptance of the introduction of superficially similar AIs and how the outputs and biases such as purported associations between race and criminality of facial biometrics systems have been determined by the historical nature of the underlying datasets they analyze Reading Faces approaches these issues within the sweep of Western History how it has shaped conceptual categories about the application and ethics of AI and tried to foist those ideas and values on the Global South This book is essential reading for postgraduates scholars as well as non specialist readers such as booksellers and librarians interested in modern AI technology

Identifying the English Edward Higgs, 2011-10-06 Personal identification is very much a live political issue in Britain and this book looks at why this is the case and why paradoxically the theft of identity has become ever more common as the means of identification have multiplied Identifying the English looks not only at how criminals have been identified branding fingerprinting DNA but also at the

identification of the individual with seals and signatures of the citizen by means of passports and ID cards and of the corpse Beginning his history in the medieval period Edward Higgs reveals how it was not the Industrial Revolution that brought the most radical changes in identification techniques as many have assumed but rather the changing nature of the State and commerce and their relationship with citizens and customers In the twentieth century the very different historical techniques have converged on the holding of information on databases and increasingly on biometrics and the multiplication of these external databases outside the control of individuals has continued to undermine personal identity security *Rhythm and Vigilance* Vita Peacock, Mikkel Keni Bruun, Claire Elisabeth Dungey, Matan Shapiro, 2025-05-16 Available open access digitally under CC BY NC ND licence Studies of surveillance have emphasised how technology is used to control space This innovative collection examines how new monitoring technologies are also affecting the experience of time Drawing on Henri Lefebvre's concept of rhythm the book brings together ethnographic research from Europe China and the US to show how digital monitoring is transforming spatio temporal relations across the Global North As digital technologies continue to reshape the rhythms of life this book makes a valuable contribution to both anthropology and surveillance studies

**Seeking Security** G R Sullivan, Ian Dennis, 2012-04-13 Many academic criminal lawyers and criminal law theorists seek to resolve the optimum conditions for a criminal law fit to serve a liberal democracy Typical wish lists include a criminal law that intervenes against any given individual only when there is a reasonable suspicion that s/he has caused harm to the legally protected interests of another or was on the brink of doing so Until there is conduct that gives rise to a reasonable suspicion of criminal conduct by an individual s/he should be allowed to go about his or her business free from covert surveillance or other forms of intrusion All elements of crimes should be proved beyond any reasonable doubt Any punishment should be proportionate to the gravity of the wrongdoing and when the offender has served this punishment the account should be cleared and good standing recovered *Seeking Security* explores the gap between the normative aspirations of liberal criminal law scholarship and the current criminal law and practice of Anglophone jurisdictions The concern with security and risk which in large part explains the disconnection between theory and practice seems set to stay and is a major challenge to the form and relevance of a large part of criminal law scholarship **The American Journal of Sociology**, 2003 *Accounting For Horror* Nigel Eltringham, 2004-01-20 This is the first book to explore how the events of 1994 have been interpreted within the politics of post genocide Rwanda **The President's Annual Report** European University Institute, 1999 **Children of Fate** Nara B. Milanich, 2009-10-09 Examines the family in late nineteenth and early twentieth century Chile to show how class order and state formation were tied to particular child rearing conditions and practices **The Criminals of Lima and Their Worlds** Carlos Aguirre, 2005-01-27 The first major study of prison reform and the prison system in Peru and one of the few social histories of criminals and their world in Latin America

*Journal of Borderlands Studies*, 2007 *Defaced* Valentin Groebner, 2009-03-02 Understanding late medieval pictorial

representations of violence Destroyed faces dissolved human shapes invisible enemies violence and anonymity go hand in hand The visual representation of extreme physical violence makes real people nameless exemplars of horror formless hideous defaced In *Defaced* Valentin Groebner explores the roots of the visual culture of violence in medieval and Renaissance Europe and shows how contemporary visual culture has been shaped by late medieval images and narratives of violence For late medieval audiences as with modern media consumers horror lies less in the indescribable and alien than in the familiar and commonplace From the fourteenth century onward pictorial representations became increasingly violent whether in depictions of the Passion or in vivid and precise images of torture execution and war But not every spectator witnessed the same thing when confronted with terrifying images of a crucified man misshapen faces allegedly bloodthirsty conspirators on nocturnal streets or barbarian fiends on distant battlefields The profusion of violent imagery provoked a question how to distinguish the illegitimate violence that threatened and reversed the social order from the proper just and sanctioned use of force Groebner constructs a persuasive answer to this question by investigating how uncannily familiar medieval dystopias were constructed and deconstructed Showing how extreme violence threatens to disorient and how the effect of horror resides in the depiction of minute details Groebner offers an original model for understanding how descriptions of atrocities and of outrageous cruelty depended in medieval times on the variation of familiar narrative motifs
