ICCWS 2021 16th International Conference on Cyber Warfare and Security Dr Juan Lopez Jr, Dr Kalyan Perumalla, Dr Ambareen Siraj, 2021-02-25 These proceedings represent the work of contributors to the 16th International Conference on Cyber Warfare and Security ICCWS 2021 hosted by joint collaboration of Tennessee Tech Cybersecurity Education Research and Outreach Center CEROC Computer Science department and the Oak Ridge National Laboratory Tennessee on 25-26 February 2021. The Conference Co-Chairs are Dr Juan Lopez Jr, Oak Ridge National Laboratory Tennessee and Dr Ambareen Siraj, Tennessee Tech's Cybersecurity Education Research and Outreach Center CEROC and the Program Chair is Dr Kalyan Perumalla from Oak Ridge National Laboratory Tennessee. Protecting Our Future Jane LeClair, 2013-12-15 In the world of technology, cybersecurity is without a doubt one of the most dynamic topics of our times. Protecting Our Future brings together a range of experts from across the cybersecurity spectrum and shines a spotlight on operational challenges and needs across the workforce in military, health care, international relations, telecommunications, finance, education, utilities, government, small businesses, and nonprofits. Contributors offer an assessment of strengths and weaknesses within each subfield and, with deep subject matter expertise, they introduce practitioners as well as those considering a future in cybersecurity to the challenges and opportunities when building a cybersecurity workforce.

Fostering Innovation in the Intelligence Community Craig W. Gruber, Benjamin Trachik, 2023-09-12 In response to the increasingly ubiquitous, asynchronous, and pervasive use of cyber technology in everyday life, unique threats to cybersecurity CS have emerged, requiring innovative and systemic solutions. Of the potential threats, Ubiquitous Technical Surveillance (UTS) presents one of the most acute, generalized vulnerabilities facing the broader Intelligence Community (IC). The Department of Defense (DoD) and United States Government While security systems and networks have attempted to adapt to meet these evolving threats, internal organizational structures, culture, and human behavior often lag behind due to the inherent challenges in changing these dynamic variables. It is crucial that scientific disciplines identify systemic and innovative behavioral countermeasures that are informed by sub-disciplines of the psychology and CS literature. Innovative strategies involve collaboration amongst experts from the domains of social psychology, game theory, Bayesian statistics, and the IC, which will be discussed in depth. A special issue that pulls from cross-disciplinary professionals will have a broad impact for the IC and DOD, eliciting wide readership and spurring needed innovation.

Cultivating a culture of innovation, though difficult, is important for any enduring organization. It's downright essential for the US Intelligence Community, which must stay one step ahead of adversaries on surveillance technologies and tradecraft to be effective. This collection of articles brings together insightful research and analysis from diverse domains, moving us closer to the deeper appreciation of innovation and culture that is so urgently needed.
