Tania Lewis,Emily Potter,2013-01-11 A not so quiet revolution seems to be occurring in wealthy capitalist societies supermarkets selling guilt free Fairtrade products lifestyle TV gurus exhorting us to eat less buy local and go green neighbourhood action groups bent on swapping not shopping And this is happening not at the margins of society but at its heart in the shopping centres and homes of ordinary people Today we are seeing a mainstreaming of ethical concerns around consumption that reflects an increasing anxiety with and accompanying sense of responsibility for the risks and excesses of contemporary lifestyles in the global north This collection of essays provides a range of critical tools for understanding the turn towards responsible or conscience consumption and in the process interrogates the notion that we can shop our way to a more ethical sustainable future Written by leading international scholars from a variety of disciplinary backgrounds and drawing upon examples from across the globe Ethical Consumption makes a major contribution to the still fledgling field of ethical consumption studies This collection is a must read for anyone interested in the relationship between consumer culture and contemporary social life *The Ethical Consumer* Rob Harrison,Terry Newholm,Deirdre Shaw,2005-03-15

Chatzidakis,2016-04-14 Ethical consumerism is on the rise No longer bound to the counter cultural fringes ethical concerns

and practices are reaching into the mainstream of society and being adopted by everyday consumers from considering carbon miles to purchasing free range eggs to making renewable energy choices The wide reach and magnitude of ethical issues in society across individual and collective consumption has given rise to a series of important questions that are inspiring scholars from a range of disciplinary areas These differing disciplinary lenses however tend to be contained in separate streams of research literature that are developing in parallel and in relative isolation Ethics in Morality and Consumption takes an interdisciplinary perspective to provide multiple vantage points in creating a more holistic and integrated view of ethics in consumption In this sense interdisciplinary presupposes the consideration of multiple and distinct disciplines which in this book are considered in delineated chapters In addition the Editors make an editorial contribution in the final chapter of the book by combining these separate disciplinary perspectives to develop a nascent interdisciplinary perspective that integrates these perspectives and presents platforms for further research

Ethical Consumption James G. Carrier, Peter G. Luetchford, 2012-03-01 Increasingly consumers in North America and Europe see their purchasing as a way to express to the commercial world their concerns about trade justice the environment and similar issues This ethical consumption has attracted growing attention in the press and among academics Extending beyond the growing body of scholarly work on the topic in several ways this volume focuses primarily on consumers rather than producers and commodity chains It presents cases from a variety of European countries and is concerned with a wide range of objects and types of ethical consumption not simply the usual tropical foodstuffs trade justice and the system of fair trade Contributors situate ethical consumption within different contexts from common Western assumptions about economy and society to the operation of ethical consumption commerce to the ways that people's ethical consumption can affect and be affected by their social situation By locating consumers and their practices in the social and economic contexts in which they exist and that their ethical consumption affects this volume presents a compelling interrogation of the rhetoric and assumptions of ethical consumption

Ethical Consumption Alex Hiller, Helen Goworek, 2023-04-11 Arising from foundations in green and eco consumerism ethical consumption is a multidisciplinary area of research This shortform book presents an expert view of the empirical evidence on ethical consumption incorporating perspectives from marketing psychology and sociology It takes both a historical and a thematic perspective covering definitions of ethical consumption typologies of ethical consumer practices successes brought about from consumer actions and the current challenges It also focuses on the emergence of contemporary perspectives on ethical consumer behaviour from three discrete perspectives those focusing on consumer segmentation the profiling of ethical consumers those which take a psychological approach the decision making processes which underpin ethical consumption and those which are sociological in nature the identities and practices which underpin ethical consumption The book finally synthesises these perspectives in the context of the problems that are often claimed to exist such as the existence of the attitude behaviour gap and provides conclusions which make recommendations for practice

and further research It will be of interest to academics and students of marketing consumption and related fields as well as to practitioners and policymakers who want to understand more about the evidence pertaining to ethical consumers what motivates them and how to encourage and educate them to consume more ethically

**Consumption Norms and Everyday Ethics** L. Pellandini-Simányi, Léna Pellandini-Simányi, 2014-03-11 How much is acceptable to consume What is appropriate to consume and which goods fall into the disapproved category Answers to these questions vary widely across time and space This book examines the sources of this variation by providing an account of how everyday consumption norms develop why they differ and why they change

**Ethical Consumption** Sophie Dubuisson-Quellier, 2013 Consumers are often importuned to exercise responsibility in the market sphere and to consume with an eye to their obligations as citizens They express their ideals directly through their purchases participating in larger scale protests boycotting products from a large multinational corporation buying ethical products resisting advertising campaigns and supporting alternative forms of trade Whether in the form of a small collective action or a mass movement the capacity to put new environmental or ethical social issues on the political economic or media agenda via the market is quite real While most ethical consumption does not challenge capitalism or the very foundations of the market itself it does raise issues and consciousness about social and environmental justice In Ethical Consumption Dubuisson Quellier suggests that ethical consumption can create a consumerism that is not only a forum for expressing the needs and wants as the market has done in the past but as a space for the construction of social responsibility

**Globalizing Responsibility** Clive Barnett, Paul Cloke, Nick Clarke, Alice Malpass, 2010-12-09 Globalizing Responsibility The Political Rationalities of Ethical Consumption presents an innovative reinterpretation of the forces that have shaped the remarkable growth of ethical consumption Develops a theoretically informed new approach to shape our understanding of the pragmatic nature of ethical action in consumption processes Provides empirical research on everyday consumers social networks and campaigns Fills a gap in research on the topic with its distinctive focus on fair trade consumption Locates ethical consumption within a range of social theoretical debates on neoliberalism governmentality and globalisation Challenges the moralism of much of the analysis of ethical consumption which sees it as a retreat from proper citizenly politics and an expression of individualised consumerism

*Ethical Consumption: Practices and Identities* Yana Manyukhina, 2018-05-11 This book engages with the topic of ethical consumption and applies a critical realist approach to explore the process of becoming and being an ethical consumer By integrating Margaret Archer's theory of identity formation and Christian Coff's work on food ethics it develops a theoretical account explicating the generative mechanism that gives rise to ethical consumer practices and identities The second part of the book presents the findings from a qualitative study with self perceived ethical food consumers to demonstrate the fit between the proposed theoretical mechanism and the actual experiences of ethically committed consumers Through integrating agency focused and socio centric perspectives on consumer behaviour the book develops a more comprehensive and balanced

approach to conceptualising and studying consumption processes and phenomena

Timothy M. Devinney, 2010 A no holds barred examination of ethical consumerism

Dias Simões, 2013 Consumption patterns influence our quality of life in deep ways having a substantial effect on both the individual and the society as a whole Most consumption decisions we make on a daily basis may have an ethical content Normally our ethical concerns result from personal beliefs and societal influences not from the Law The question then becomes whether public entities have legitimacy to impose certain dimensions of ethical behaviour and whether Consumer Law is the appropriate mechanism to achieve such purposes Government's role in moulding our consumption habits is doubtful as there is no consensus about the role that Law should play in the promotion of ethical conducts Traditionally Consumer Law was aimed at protecting the consumer himself Should legal intervention be expanded to guide consumer behaviour even when the protection of consumers as such is not the goal In some cases public intervention may be justified with the impact of individual decisions on the community as a whole In fact the State is interested in controlling the social costs of individuals behaviours that are borne by society at large However going beyond the frontier of public interest may be troublesome This new field of regulatory intervention touches upon some of the values that define us as a society personal freedom choice and liberty Any intervention in this regard should consider the balance between individual freedom and public interest Citizens should not be treated as creatures deprived of any moral or ethical character

consumption patterns among individual as well as institutions for instance through reducing meat consumption switching to organic or fair trade products boycotting or buycotting certain products or consuming less overall There is considerable disagreement regarding how to bring this about whose responsibility it is and even whether it is desirable Is it a question of political initiatives producer responsibility the virtues and vices of individual consumers in the developed world or something else Many of these issues pose profound intellectual challenges at the intersection of ethics political philosophy economics and several other fields This publication brings together contributions from scholars in numerous disciplines including philosophy law economics sociology and animal welfare who explore the theme of the ethics of consumption from different angles
