Ethics And Research In Inclusive Education Values Into Practice:

Ethics and Research in Inclusive Education Kieron Sheehy, 2005 The recent move towards inclusive education has radically influenced the way educational research is conducted Students need to become aware of the critical legal and ethical responsibilities that arise from investigation in this new and expanding area Written from the standpoint of inclusive education rather than special education this carefully edited collection of readings from a wide variety of sources will develop the student's ability to identify and respond to ethical dilemmas that occur within their particular research methodologies and settings respond appropriately to the myriad of complex legal issues that are pertinent to their own work The contributions to this book draw upon examples of inclusive practices from around the world Students taking postgraduate courses or diplomas in Inclusive education will find this an invaluable read *Rethinking Inclusive Education: The Philosophers of Difference in Practice* Julie Allan, 2007-11-07 One of the important responsibilities that advocates of inclusion need to continually practise is that of self criticism This includes examining and re-examining the assumptions informing our perspectives the concepts that we use including inclusive education and our intentions especially in relation to the question of change We need to beware of the danger of unexamined orthodoxies the possibilities of adopting inclusive language with little if any changes in our thinking and practice and a sterile and insensitive position with regard to the pursuit of new or alternative ideas In this very important book Allan powerfully reminds us of the necessity and centrality of these concerns and provides a direct perceptive and thoughtful examination and critique of the varied barriers to the task of how to make inclusion happen Allan challenges the reader to step back and re-examine the rationale for inclusion through an alternative mindset She challenges the varied attacks upon inclusion including those in the education business to stop using economic it costs too much and pedagogical it is bad for the other children in the class and traumatic for the disabled children and social just too much for the teacher's workload reasons for closing the door and doing the right thing and those who argue that inclusion was an experiment that did not work **Effective Teacher Education for Inclusion** Deborah Robinson, 2024-08-28 Drawing on research carried out in partnership with schoolteachers school leaders and student teachers this book presents cutting edge research on teacher education and how it can be used to catalyse the development of inclusive practice in mainstream schools and classrooms Theoretically robust and guided by the author's near 40 years of experience as an educationalist this research informed book offers an account of the practices and principles that underpin effective teacher education for special educational needs and disability SEND Chapters propose transformative approaches towards effective teacher education whilst also exploring the dangers of de-intellectualisation to the promotion of inclusive practices in doing so this book reasserts the indispensability of intellectual labour to the development of the inclusive teacher Ultimately this book argues that teacher education curricula must include critical theoretical work and reflexive projects offering intellectually rich and critical approaches whilst also defending the important role that higher education plays in the

context of partnership with schools At a time when urgent questions around equity are being discussed on the global stage this book will be of interest to scholars researchers and postgraduate students in the fields of inclusion and special education teacher education and the theory of education more broadly Teacher educators and policymakers working towards equitable quality education for all will also find the volume of use

Research Methods in Educational Leadership and Management Ann R J Briggs, Marlene Morrison, Marianne Coleman, 2012-07-06 The essential guide to research in educational leadership and management substantially revised and updated

Reconsidering Inclusion Alison Ekins, 2016-09-13 Informed by research undertaken on the reality of developing inclusive practices in schools and years of practitioner experience in the field of education Reconsidering Inclusion shows how staff's social and emotional relationships can sustain and build inclusive practices Providing engaging discussion of key findings and themes central to the practitioner encouraging them to critically engage in developing inclusive practices in their schools readers will find reflective questions about their practice and examples of key competing perspectives to enhance deeper understanding Ekins presents authentic accounts and discussions of the reality of developing inclusive practices as experienced and explained by teachers faced with the responsibility of enacting those practices The book concludes with a discussion on achievable implications for practice both at a personal and professional level Reconsidering Inclusion is suitable for all those interested in inclusive practice and provides a much needed critical insight into inclusive practices in schools

Inclusion, Disability and Culture Elsayed Elshabrawy Ahmad Hassanein, 2015-02-03 This book examines some theoretical and empirical aspects about complexities of inclusion disability and culture It challenges the globalized technical and reductionist approach of inclusion and argues that concepts of disability and inclusion are culturally constructed Disability and inclusion are concepts which do not define a global agenda in the sense that one size fits all Rather they should be seen as being completely context dependent and that they should be deconstructed with respect to specific cultural contexts with respects to society ethics religion and history The main argument of the book is that many cultural backgrounds including Egyptians have their own long standing beliefs and practices which do not define or address disability in the same way as western culture Such cultural differences in understanding disability may lead to different understandings conceptualizations and practices of inclusion The book articulates disability and inclusion within a socio ethical religious discourse based on the Islamic underpinnings of equality and differences This discourse enhances and supports the calls for considering inclusion and disability within a cultural model that takes into account the common values about disability in any given context which consequently will affect the way educational provision is provided in that context Finally the book challenges the psychological concept of attitude that has been represented in the literature simply as a matter of acceptance or rejection Inclusion Disability and Culture shows that attitude is a complex and context dependent issue that can't be understood in isolation from the wider context within which such responses were created Specifically the role of the social views about disability religious values school cultures

educational system and structural and organizational constraints can't be underestimated in understanding teachers' attitudes towards a complex issue like inclusion

Researching Learning in Virtual Worlds Anna Peachey, Julia Gillen, Daniel Livingstone, Sarah Smith-Robbins, 2010-02-05 Most of the chapters in this book are extended papers from Research Learning in Virtual Environments reLIVE08 an international conference held by the UK Open University in Milton Keynes in November 2008. Authors of the best papers and presentations from the conferences were invited to contribute to Research Learning in Virtual Worlds the first book to specifically address research methods and related issues for education in virtual worlds. The book covers a range of research undertaken in virtual worlds. It opens with an accessible introduction both to the book and to the subject area making it an ideal springboard for those who are new to research in this area. The subsequent ten chapters present work covering a range of research methodologies across a broad discipline base providing essential reading for advanced undergraduate or postgraduate researchers working in education in virtual worlds and engaging background material for researchers in similar and related disciplines

Doing Action Research in Early Childhood Studies Glenda Mac Naughton, Patrick Hughes, 2008-09 This title is a resource and inspiration for people in the early childhood field who wish to do action research but are unsure as to precisely what it means and how to do it

Virtual Worlds Kieron Sheehy, Rebecca Ferguson, Gill Clough, 2010 The book deals with the challenges that arise when virtual worlds are used for learning and teaching. The ideas and practices emerging from this field are relevant to all educators and offers insights into the development of a pedagogy that is authentic, inclusive and enjoyable. Each chapter addresses a particular issue and is illustrated with examples drawn from both research and practice. These examples cover a wide range of learning scenarios both formal and informal involving teenagers, school pupils, undergraduate and postgraduate students as well as a variety of lifelong learners. The issues include the importance of virtual worlds, the influence of online games and physical world economics and politics, the relationship between avatars and learner identity, the challenges of ensuring child safety and protection, interaction between real world and in world environments and activities, accessibility and the development of new pedagogues. The authors are all teachers and learners in virtual worlds many have been responsible for designing programming and maintaining virtual environments

Key Methods in Geography Nicholas Clifford, Gill Valentine, 2003-06-06 Key

Methods in Geography is an introduction for undergraduates to the principal methodological issues involved in the collection analysis and presentation of geographical information. It provides an accessible primer which will be used by students as a reference throughout their degree on all issues from research design to presentation. A unique feature of the book is that it provides definitions of terms from both human geography and physical geography. Organized into four parts: Getting Started in Geographical Research, Data Collection in Human Geography, Data Collection in Physical Geography, Analyzing and Representing Geographical Data. Each chapter is comprised of a short definition, a summary of the principal arguments, a substantive 5 000 word discussion, the use of real life examples and annotated notes for further reading. The teaching of research methods is integral in all geography courses. Key Methods in Geography identifies the key analytical and observational strategies with which all geography undergraduates should be conversant. The American Journal of Occupational Therapy, 1995. An Introductory Guide to EC Competition Law and Practice Valentine Korah, 1994.

Inclusion and Diversity in Education: Developing inclusive schools and school systems Peter Hick, Gary Thomas, 2009. This 4 volume set brings together seminal articles and key writings on the theme of inclusion and diversity in education. The collection takes disability and special educational need as a starting point from which to develop a broader focus on a range of themes relating to learners who may be marginalised from educational opportunities. This includes for example members of minority ethnic communities, students excluded from schools or who are looked after in public care and other dimensions of exclusion arising from social class, gender or sexuality. The starting point for understanding inclusive education lies in social justice perspectives and this forms the basis for the first volume. Volumes two and three focus on research aimed at developing more inclusive practices both at the levels of schools and school systems and at the levels of inclusive pedagogy enacted in the classroom and through the curriculum. Volume four reflects the range of voices in research on inclusive education, drawing on traditionally marginalised voices and those of learners in particular. Three cross cutting themes are represented across all four volumes: a chronological approach showing how key concepts and perspectives have developed in each area of the literature; identified groups of learners; developing more nuanced readings of how processes of exclusion and inclusion intersect dimensions such as disability, class and race and contexts for learning such as urban education and global or comparative perspectives.
