The Making of Elite Women Tanja Müller,2021-11-29 This book is a thorough study about the

upcoming of elite women in Eritrea encompassing the time of the armed struggle for liberation as well as its aftermath up to the tenth anniversary of Eritrean independence in 2001 and beyond It is a multi disciplinary study combining a comprehensive analysis of Eritrean history society and political developments with extensive case study research into the lives of different groups of elite women Modernisation processes created by the Eritrean revolution fostered an environment

in which women are regarded as equal and encouraged to occupy positions of leadership At the same time the revolution s hegemonic ideology does not envisage women opting out of its version of modernity thus new avenues open up only for those who subscribe to the revolution s narrative of progress Furthermore it is argued that while the Eritrean revolution played a decisive role in opening up possibilities for women s emancipation a failure to implement democratic structures of governance puts the revolution s societal achievements at risk its legacy might well rest with possibilities of personal liberation in individual lives Database on Ethiopian Educational Research Amare Asgedom,Getahun Watumo,Wossenu Yimam,2000 *Journal of Ethiopian languages and literature* ,1993 **Cultivating Dynamic Educators** Sarah Pouezevara,2018-09-28 Cultivating Dynamic Educators Case Studies in Teacher Behavior Change in Africa and Asia responds to growing recognition by international education professionals policy makers and funding partners of the need for qualified teachers and interest in the subject of teacher professional development also referred to as teacher behavior change The book responds to important questions that are fundamental to improving teaching quality by influencing teaching practice These questions include How do we provide high quality training at scale How do we ensure that training transfers to change in practice What methods are most cost effective How do we know what works The book includes case studies describing different approaches to teacher behavior change and illustrates how specific implementation choices were made for each context Individual chapters document lessons learned as well as methodologies used for discerning lessons The key conclusion is that no single effort is enough on its own teacher behavior change requires a system wide view and concerted coordinated inputs from a range of stakeholders Business, Industry, and Trade in the Tropics Jacob Wood,Taha Chaiechi,K Thirumaran,2022-03-21 The tropics is an area of enormous opportunity and potential The countries situated between the Tropics of Cancer and Capricorn are largely developing in nature There is huge interest in the types of business investments made in Southeast Asia Central Africa and the Amazonian tropical belts These tropical regions continue to face opportunities and challenges in attracting foreign direct investments as well as the need to complement and or compete with larger economies external to the tropics This book provides an empirical assessment of the key sociocultural economic environmental and political factors that influence the business dynamics of organizations operating within the tropics It will address but is not limited to topics such as attracting businesses to the tropics facilitating smooth stable conditions for business operations and sustainability national institutions and regulations that shape the way business is done and the increasing deployment of new technologies and entrepreneurial innovations which are defining the global tropics as a distinct business region It will offer readers a key focus for developing a deeper understanding of the factors and frameworks that influence and shape business activity in the area While the primary audience for the book consists of academics and students from the fields of economics environmental economics developmental economics business international trade tourism and area studies it will also provide a practical resource for government policy analysts wanting to fully appreciate
