## **Ethnography And Language Policy:**

**Ethnography and Language Policy** Ernest Duffy, 2017-05-02 Illuminating through ethnographic inquiry how individual agents make language policy in everyday social practice this volume advances the growing field of language planning and policy using a critical sociocultural approach From this perspective language policy is conceptualized not only as official acts and documents but as language regulating modes of human interaction negotiation and production mediated by relations of power

**Ethnography and Language Policy** Teresa L. McCarty, 2014-04-04 Seeking to expand policy discourses in ways that lead to social justice for all this volume uses a critical sociocultural and ethnographic approach to address a variety of pressing language planning and policy issues contextualized in case studies **Ethnography of Language Policy**, 2013

**Engaged Language Policy and Practices** Kathryn A. Davis, Prem Phyak, 2016-12-08 Engaged Language Policy and Practices re envisions language policy and planning as an engaged approach drawing on and portraying theoretical and educational equity perspectives It calls for the right to language policy making in which all concerned communities parents students educators and advocates collectively imagine new strategies for resisting global neoliberal marginalization of home languages and cultural identities This book subsequently emphasizes the means by which engaged dialectic processes can inform and clarify language policy making decisions that promote equity In other words rather than descriptions of outcomes the authors emphasize the need to detail the means by which local regional actors resist and transform inequitable policies These descriptions of processes thereby provide all actors with ideological pedagogical and equity policy tools that can inform situated school and community policy making This book depicts ways in which engaged language policy embodies the intersection of critical inquiry participant involvement and ongoing engaged language planning processes It further offers an alternative to the traditional top down approach to language education policy making Engaged Language Policy and Practices is essential reading for scholars teachers students communities and others concerned with worldwide language and identity equity Special Issue Ethnography of Language Policy David Cassels Johnson, 2013 *War Or Common Cause?*

Kimberly S. Anderson, 2009 A volume in Education Policy in Practice Critical Cultural Studies Series Editors Bradley A U Levinson and Margaret Sutton Indiana University This book on bilingual education policy represents a multidimensional and longitudinal study of policy processes as they play out on the ground a single school in Los Angeles and over time both within the same school and also within the state of Georgia In order to reconstruct this complex policy process Anderson impressively marshals a great variety of forms of discourse Most of this discourse of course comes from overheard discussions and spontaneous interviews conducted at a particular school the voices of teachers and administrators Such discourse forms the heart of her ethnographic findings Yet Anderson also brings an ethnographer's eye to national and regional debates as they are conducted and represented in different forms of media especially newspapers and magazines She then uses the key theoretical concept of articulation to conceptually link these media representations with local school

discourse The result is an illuminating account of how everyday debates at a particular school and media debates occurring more broadly mutually inform one another Reviews Anderson s timely methodologically sophisticated and compelling account surrounding the politics of bilingual education moves beyond instrumental notions of policy to advance the idea that mandates are themselves resources that may be vigorously contested as contending parties vie for inclusion in the schooling process Her work artfully demonstrates how improving schooling for all children is inseparable from a larger much needed discussion of what we as a polity believe about whether and how we are interconnected together with who should and does have a voice in the policy making and implementation process Angela Valenzuela Professor University of Texas at Austin author of *Subtractive Schooling and Leaving Children Behind* Anderson shows the gap between clear cut assumptions and ideologies informing education policy and legislation on language and immigration and the complications that arise for teachers when they actually implement language legislation in the classroom She also illustrates assumptions about language and being American as these are both debated and shared by each side of the language and immigration debates in California and Georgia Her chapter on California s Proposition 227 is a particular eye opener demonstrating in detail the embedding of local identities and oppositions in these debates Above all she makes quite clear the complex often contradictory web of relations among politics language race and cultural citizenship Bonnie Urciuoli Professor Hamilton College author of *Exposing Prejudice*

### **Interviewing and Conversation Analysis in Ethnography of**

**Language-in-Education Policy** Goodman,2017 In the 2010 2011 academic year I conducted an ethnographic case study of a Ukrainian university in a predominantly Russian speaking city that was beginning to teach subjects in English The purpose of this study was to explore the relationship among these three languages and additional foreign languages in the university as well as the relationship between the decision to use English as a medium of instruction and national policies that promote Ukrainian but are at times ignored in Russian speaking regions of the country The purpose of this research case is twofold First I show how I developed interview questions about language policy that seemed to reflect local norms of communication and offered a means of eliciting answers relevant to my research questions Second I show how I applied conversation analysis to the nevertheless unexpected answers to understand why respondents answered as they did that is what they were oriented to in my question Once I understood their orientations to language policy I could then interpret the actual answers from a perspective of the power of the individual and institution over the national government in language policy
