Happiness Within Professor (Dr.) Kalyan Bhattacharya, India is a land of spiritual seeker. From the time of Vedas 3000-10 000 BCE down to the Upanishads and still afterwards seekers for the truth from their own core of heart came out to get a real Wisdom about the Universe and Wisdom within oneself. Thousands of such enlightened persons called Sadhakas from India over centuries follow the path of Wisdom, enlightenment or Mokhya for knowing the truth. Thus it may be visualized that religion of God is the religion of truth. Scientists all over the world are also working hard and running after the truth and mysteries of the world and foundation of the life processes. Thus motivation of a spiritual seeker and a scientist are one and the same that is to know the truth to be enlightened. Eventually at one stage a scientist becomes a philosopher or otherwise a philosopher becomes a scientist. In this way science and philosophy converge at the point of truth or God Realisation. In this book the author provided some such scientific documentations for betterment of day to day life experiences through Yoga and Meditation, a primeval Indian cultural practice discovered by sages and spiritual seekers. Fortunately from 1980 onwards an accelerating researches on the benefit of Yoga, Hatha yoga, Meditation is coming out and presently the voluminous literatures in the subject casting no doubt for its health benefit effects. Let us hope for the day when meditation will replace medication.

Nature of Science in General Chemistry Textbooks Mansoor Niaz, Arelys Maza, 2011-07-15

Research in science education has recognized the importance of history and philosophy of science. HPS Nature of science NOS is considered to be an essential part of HPS with important implications for teaching science. The role played by textbooks in developing students' informed conceptions of NOS has been a source of considerable interest for science educators. In some parts of the world, textbooks become the curriculum and determine to a great extent what is taught and learned in the classroom. Given this background and interest, this monograph has evaluated NOS in university level general chemistry textbooks published in U.S.A. Most textbooks in this study provided little insight with respect to the

nine criteria used for evaluating NOS Some of the textbooks however inevitably refer to HPS and thus provide guidelines for future textbooks A few of the textbooks go into considerable detail to present the atomic models of Dalton Thomson Rutherford Bohr and wave mechanical to illustrate the tentative nature of scientific theories an important NOS aspect These results lead to the question Are we teaching science as practiced by scientists An answer to this question can help us to understand the importance of NOS by providing students an HPS based environment so that they too just like the scientists feel the thrill and excitement of discovering new things This monograph provides students and teachers guidelines for introducing various aspects of NOS based on historical episodes
