Genetic Geographies The Trouble With Ancestry:

Genetic Geographies Catherine Nash, 2015-04-01 What might be wrong with genetic accounts of personal or shared ancestry and origins Genetic studies are often presented as valuable ways of understanding where we come from and how people are related In *Genetic Geographies* Catherine Nash pursues their troubling implications for our perception of sexual and national as well as racial difference Bringing an incisive geographical focus to bear on new genetic histories and genetic genealogy Nash explores the making of ideas of genetic ancestry indigeneity and origins the global human family and national genetic heritage In particular she engages with the science culture and commerce of ancestry in the United States and the United Kingdom including National Geographic's Genographic Project and the People of the British Isles project Tracing the tensions and contradictions between the emphasis on human genetic similarity and shared ancestry and the attention given to distinctive patterns of relatedness and different ancestral origins Nash challenges the assumption that the concepts of shared ancestry are necessarily progressive She extends this scrutiny to claims about the natural differences between the sexes and the nature of reproduction in studies of the geography of human genetic variation Through its focus on sex nation and race and its novel spatial lens *Genetic Geographies* provides a timely critical guide to what happens when genetic science maps relatedness

DNA, Race, and Reproduction Emily Klancher Merchant, Meaghan O'Keefe, 2025-01-07 A free ebook version of this title is available through Luminos University of California Press's Open Access publishing program Visit www.luminosoa.org to learn more *DNA Race and Reproduction* helps readers inside and outside of academia evaluate and engage with the current genomic landscape It brings together expertise in law medicine religion history anthropology philosophy and genetics to examine how scientists medical professionals and laypeople use genomic concepts to construct racial identity and make or advise reproductive decisions often at the same moment It critically and accessibly interrogates how DNA figures in the reproduction of racialized bodies and the racialization of reproduction and examines the privileged position from which genomic knowledge claims to speak about human bodies societies and activities The volume begins from the premise that reproduction regardless of the means forces a confrontation between biomedical scientific and popular understandings of genetics and that those understandings are often racialized It therefore centers reproduction as both a site of analysis and an analytic lens

Tabula Rasa Duana Fullwiley, 2024-04-23 Duana Fullwiley has penned an intimate chronicle of laboratory life in the genomic age She presents many of the influential scientists at the forefront of genetics who have redefined how we practice medicine and law and understand ancestry in an era of big data and waning privacy Exceedingly relatable and human the scientists in these pages often struggle for visibility
