Geobiology Microbial Mats In Sandy Deposits From The Archean Era To Today:

Geobiology Nora Noffke, 2010-06-28 A murmur is heard from the depths of time Life and Earth are engaged in a dialog that has lasted for four billion years Sometimes it s a whisper sometimes a roar One part sometimes gets the upper hand dominates the discussion and sets the agenda But mostly the two have some kind of mutual understanding and the murmur goes on Most of us don t listen Nora does She listens and she tries to understand Nora Noffke has focused her scientific career on the interaction between the living and the non living This is no mean task in an academic world where you are usually either this or that such as either a biologist or a geologist The amount of stuff you need to grasp is so large that it usually feels better to sit comfortably on one chair rather than to risk falling between them Geobiology is not for the faint of heart Nora s focus is on that all important biological substance mucus or EPS extracellular polymeric substance EPS is the oil in the machinery the freeway to travel for many small animals and protists the coat of armour for others the mortar in the brick wall for yet others For microbes such as cyanobacteria it may be the world they built the world they live eat fight multiply and die in

Ichnology in Shallow-marine and Transitional Environments C. Cónsole-Gonella, S. de Valais, I. Díaz-Martínez, P. Citton, M. Verde, D. McIlroy, 2023-06-06 The ichnology of shallow marine to transitional environments is a key field of study with respect to understanding the variability of environmental parameters from inshore marginal marine settings to the offshore transition zone Over the last decades ichnology has evolved from being a tool to determine bathymetry becoming the standard palaeoenvironmental methodology by which trace fossils can be used to inform sedimentary facies models In particular the analysis of mixed assemblages of invertebrate and vertebrate trace fossils allows detailed palaeoenvironmental and facies analysis This volume focuses on the ichnological record of shallow marine to transitional environments through the geological record in addition to modern ones through neoichnology
