On the Definition of Geography as a Science J. Batalha-Reis, 2015-06-15 Excerpt from On the Definition of Geography as a Science And on the Conception and Description of the Earth as an Organism And as to be complete in their work geologists must always describe the distribution on Earth of the beings and phenomena which they study and geographers must always refer to the nature and history of the beings and phenomena they describe geologists are always in fact assuming the position of geographers as geographers are constantly assuming the position of geologists While studying the wear and transportation of rocks by water and air the opening of new valleys the filling up of old ones the changes of course in running waters the upheaval or subsidence of lands the composition of the materials before and after the different phenomena as well as their causes geographers are geologists The circumstance of all the above mentioned facts having taken place before or after the known existence of man on Earth or that of their having became known through natural vestiges or by the evidence of human monuments can not alter in any way their essential nature The way in which sands are being formed and cemented now and the way in which sandstones were formed and cemented in Devonian times belong both alike to the domain of geologists The description of a volcano or the description of the distribution of all the volcanoes of the present day or of the volcanoes of the so called geological ages belongs entirely to Geography But the study of a volcano whether it rises to morrow or has existed during the Tertiary epoch belongs to Geology The description of the distribution on Earth of ancient

and extinct biological species part of Palaeontology is as much Geography as the description of the distribution on Earth of actual living beings floras faunas The latter indeed cannot be completely done without the former The description of the whole Earth or the description of a limited locality in different epochs is Geography The study of the evolution of the transformations which have successively fixed the features of the whole Earth or of some of its parts is Geology The description of the Earth during Tertiary times is Geography The study of the formation of actual lands is Geology Geography describes the distribution of human races as it describes the distribution of all other animal species and even the distribution of languages and religions on Earth but only other sciences study these particular classes of facts in themselves Geography merely accepts and describes aspects Geology investigates the nature of the elements the evolution of the beings in action and therefore explains About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www forgottenbooks com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works On the Definition of Geography as a Science: And on the Conception and Description of the Earth as an Organism (Classic Reprint) J. Batalha-Reis, 2018-03-07 Excerpt from On the Definition of Geography as a Science And on the Conception and Description of the Earth as an Organism IN this paper I propose brie y to indicate what in my Opinion Geo graphy requires to become a science a rather limited science if it remains in its pure condition a vast and comprehensive science if it consciously accepts the natural fertile and inevitable association with Geology In these words the Opinion is implied that Geography cannot at the present moment be considered as a science About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www forgottenbooks com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works A Short and Easy Introduction to the Science of Geography ...
