General Microbiology Linda Bruslind,2020 Welcome to the wonderful world of microbiology Yay So What is microbiology If we break the word down it translates to the study of small life where the small life refers to microorganisms or microbes But who are the microbes And how small are they Generally microbes can be divided in to two categories the cellular microbes or organisms and the acellular microbes or agents In the cellular camp we have the bacteria the archaea the fungi and the protists a bit of a grab bag composed of algae protozoa slime molds and water molds Cellular microbes can be either unicellular where one cell is the entire organism or multicellular where hundreds thousands or even billions of cells can make up the entire organism In the acellular camp we have the viruses and other infectious agents such as prions and viroids In this textbook the focus will be on the bacteria and archaea traditionally known as the prokaryotes and the viruses and other acellular agents
