RESPONSIBLE COMPUTER DIVING

Since the advent of dive computers, it is a common mistake to assume that the old traditional rules of diving no longer apply, but the truth is just the opposite. Before you dive using your ReACT, keep these basic rules in mind:

- Plan each dive, and dive your plan - Your computer was not designed to make decisions for you, only to provide you with the information you need to make responsible decisions for yourself. This begins with a dive plan that will help you avoid a low air or decompression situation.
- Do not plan any dive that exceeds your training or experience level.
- Inspect your computer before every dive - If it shows any signs of damage or abnormal function, DO NOT dive with it until it has received factory service.
- Make your deepest dive first - When making repetitive dives, it is imperative to ensure that each consecutive dive is shallower than the one before. This will allow your body's slower tissues to continue outgassing nitrogen.
- Make the deepest part of your dive first, and gradually work your way to the surface using a staircase profile - The ability to perform multilevel diving is one of the most important contributions of a dive computer, and you should take advantage of it. It will increase your bottom time and at the same time decrease your risk of decompression sickness.
- Ascend slowly by following an ascent line whenever possible, or by ascending diagonally toward the surface - Watch the Ascent Rate Indicator closely while you ascend, and keep it in the green zone as much as possible.
- Make a safety stop at 15-20 feet (4.5-6 m) at the end of every dive - A safety stop of as little as 5 minutes has been shown to have a dramatic effect on the bubble formation in divers. It's important. Don't forget it.

This monograph examines and analyses the phenomenon of non binding instruments also known as soft law in the law of armed conflict or international humanitarian law In the past 30 years there have been several non binding instruments created designed as either best practice guidelines or re statements of applicable law These instruments are not treaties but they nevertheless put themselves forward as authoritative statements of what the law is and in some instances what the law should be Soft law instruments can be dynamic prompt and responsive measures to address pressing issues in armed conflicts By drawing on the skill of a small group of experts these instruments can be debated and drafted in a timelier manner than if these issues were to be left to the international community of 194 States to resolve Furthermore because these instruments do not have to be sent for debate to an international conference of States it means that the provisions are not subject to the usual revisions reservations and dilutions that come with attempting to reach consensus However there are potential and actual problems with these instruments and the processes that bring them to fruition and how they are received in practice by States and other stakeholders This volume looks at the benefits and drawbacks for States and non State actors with regards to soft law whether they are effective additions to the law of armed conflict analysing the development through the lens of theories of legitimacy and legality in international law **The Teacher's handbook of psychology** James Sully, 1914 *The Oxford Handbook of the History of Consumption* Frank Trentmann, 2012-03-22 The Oxford Handbook of the History of Consumption offers a timely overview of how our understanding of consumption in history has changed in the last generation Christian Home Educators' Curriculum Manual Cathy Duffy, 1997-11 *The Corruption of Interest* Ron Gallo, 2023-10-10 This book I consider one of my best and most intense The false truth about what s going on in our society and the world has gotten so ridiculous that I felt I had to write this to advise believers and non believers the truth as Jesus states in the word in John 14 6 I have to be Biblically correct this is Gods world not Washingtons I start off with Interest which God meant for good but man has corrupted it Did you know that you can learn from a spider how to be closer to God and live a more fulfilled Christian life of discipleship Did you know you can learn from the child and the dog about yourself There are many other gems wisdom that you will love and learn from In my other books you can find on Amazon you would get a great blessing as well There are the three volumes on Balance The Spider and the Saint When I look up and the childrens book Charlie the Spider and friends I wrote them differently then other books out there There are jokes
