Genesis And Development Of A Scientific Fact:

Genesis and Development of a Scientific Fact Ludwik Fleck, Thaddeus J. Trenn, 2024-05-31 Originally published in German in 1935 this monograph anticipated solutions to problems of scientific progress the truth of scientific fact and the role of error in science now associated with the work of Thomas Kuhn and others Arguing that every scientific concept and theory including his own is culturally conditioned Fleck was appreciably ahead of his time And as Kuhn observes in his foreword Though much has occurred since its publication it remains a brilliant and largely unexploited resource To many scientists just as to many historians and philosophers of science facts are things that simply are the case they are discovered through properly passive observation of natural reality To such views Fleck replies that facts are invented not discovered Moreover the appearance of scientific facts as discovered things is itself a social construction a made thing A work of transparent brilliance one of the most significant contributions toward a thoroughly sociological account of scientific knowledge Steven Shapin Science *Rescuing Humanity* Willem H. Vanderburg, 2023-05-26 In *Rescuing Humanity* Willem H Vanderburg reminds us that we have relied on discipline based approaches for human knowing doing and organizing for less than a century During this brief period these approaches have become responsible for both our spectacular successes and most of our social and environmental crises At their roots is a cultural mutation that includes secular religious attitudes that veil the limits of these approaches leading to their overvaluation Because their use especially in science and technology is primarily built up with mathematics living entities and systems can be dealt with only as if their architecture or design is based on the principle of non contradiction which is true only for non living entities This distortion explains our many crises Vanderburg begins to explore the limits of discipline based approaches which guides the way toward developing complementary ones capable of transcending these limits It is no different from a carpenter going beyond the limits of his hammer by reaching for other tools As we grapple with everything from the impacts of social media the ongoing climate crisis and divisive political ideologies *Rescuing Humanity* reveals that our civilization must learn to do the equivalent if humans and other living things are to continue making earth a home **Hermeneutic Realism** Dimitri Ginev, 2016-08-24 This study recapitulates basic developments in the tradition of hermeneutic and phenomenological studies of science It focuses on the ways in which scientific research is committed to the universe of interpretative phenomena It treats scientific research by addressing its characteristic hermeneutic situations and uses the following basic argument in this treatment By demonstrating that science's epistemological identity is not to be spelled out in terms of objectivism mathematical essentialism representationalism and foundationalism one undermines scientism without succumbing scientific research to procedures of normative democratic control that threaten science's cognitive autonomy The study shows that in contrast to social constructivism hermeneutic phenomenology of scientific research makes the case that overcoming scientism does not imply restrictive policies regarding the constitution of scientific objects Speaking about the Brain. Metaphors in popular

scientific texts Mihail Sotkov, 2015-08-25 Master's Thesis from the year 2014 in the subject English Language and Literature Studies Linguistics grade 1-3 TU Dortmund Institut für Anglistik und Amerikanistik language English abstract This paper deals with metaphorical representations of the human brain i.e. brain metaphors in popular scientific texts A corpus consisting of forty newspaper articles is analysed by applying Fauconnier and Turner's Conceptual Integration Networks 1998-2002 The work is embedded in the field of Cognitive Linguistics and tries to offer some insights in how we conceptualise the human brain in popular science revealing the nature of meaning creation as well as sketching the reciprocal interdependence of the human brain and machines as the predominant popular scientific paradigm of conceptualising human nature **Boston Studies in the Philosophy of Science**, 2002 Handbook of Research on Science Teaching and Learning Dorothy Gabel, 1994 Sponsored by the National Science Teachers Association this handbook provides a uniquely comprehensive and current survey of the best research in science education compiled by the most renowned researchers More than summaries of findings the content provides an assessment of the significance of research evaluates new developments and examines current conflicts controversies and issues in the major science disciplines biology chemistry physics and earth science Pathways of Scientific Dissent in Agricultural Biotechnology Jason Aaron Delborne, 2005 *Social Science Research Methodology* Sri Lanka.
