landscape as a form of urbanism from its origins in the Renaissance through the twentieth century Growing out of progressive architectural culture and populist environmentalism the concept was further informed by the nineteenth century invention of landscape architecture as a new art charged with reconciling the design of the industrial city with its ecological and social conditions In the late twentieth and early twenty first centuries as urban planning shifted from design to social science and as urban design committed to neotraditional models of town planning landscape urbanism emerged to fill a void at the heart of the contemporary urban project Generously illustrated Landscape as Urbanism examines works from around the world by designers ranging from Ludwig Hilberseimer Andrea Branzi and Frank Lloyd Wright to James Corner Adriaan Geuze and Michael Van Valkenburgh The result is the definitive account of an emerging field that is likely to influence the design of cities for decades to come

**Fundamentals of Geographic Information Systems** Michael N. DeMers, 2000 The second edition of this well received text on principles of geographic information systems GIS continues the author's style of straight talk in its presentation The writing is accessible and easy to follow Unlike most other texts this book covers GIS design and modeling reflecting the author's belief that modeling and analysis are at the heart of GIS This enables students to understand how to use a GIS and what it does
