Geographies Of Obesity Geographies Of Obesity:

Geographies of Obesity Dr Jamie Pearce, Professor Karen Witten, 2012-11-28 Over the past two decades rates of adult and childhood obesity in the developed world have risen sharply By the year 2000 65% of the United States population were overweight 30% of these obese Whilst medical treatment has tended to focus on individual habits of diet and exercise this approach does little to account for globally increasing levels of obesity and the external environmental factors that may be responsible This in depth study assembles the evidence for a geographical explanation of current obesity trends and is the first work to examine the ways in which environment and living conditions promote an imbalance of energy intake over energy expenditure The book calls upon the expertise of geographers nutritionists epidemiologists sociologists and public health researchers resulting in a broad multidisciplinary analysis of this important health issue Cover graphic designed by Georgia Witten Sage Geographies of Obesity Jamie Pearce, Karen Witten, 2009 *Fat Bodies, Fat Spaces* Rachel Colls, Bethan Evans, 2011-03-04 Fat Bodies, Fat Spaces Colls, 2012-01-06 Debating Obesity E. Rich, L. F. Monaghan, L. Aphramor, 2010-11-17 This book brings together critical perspectives on some of the recent claims associated with the obesity crisis It develops both theoretical and conceptual arguments around the obesity debate as well as taking a more practical focus in terms of implications for the health professions to outline an agenda for a critical weight studies

Applied Spatial Modelling and Planning John R. Lombard, Eliahu Stern, Graham Clarke, 2016-10-04 This book highlights the extraordinary range of areas to which geographical analysis and spatial modelling can bring lessons and insights It shows how these techniques have been used to address real world issues that are of concern to international organisations public agencies and businesses as illustrated by actual funded projects that geographers have developed collaboratively with end users Applied Spatial Modelling and Planning shows how much geographical research is policy relevant to a wide variety of agencies through the use of GIS and spatial modelling in applied geography The book's chapters contain a cross section of innovative applications and approaches to problem solving within five major domains of the dynamics of economic space housing and settlements population movements and population ageing health care and the environment Using a number of case studies on the use of GIS and spatial modelling this book demonstrates the fact that much of what is done by quantitative geographers is not only relevant within academia but also has use in policy work This book will appeal to an international audience interested in cutting edge spatial modelling to better understand the processes involved in solving real problems Obesity Discourse and Fat Politics Lee Monaghan, Rachel Colls, Bethan Evans, 2015-12-22 There is considerable rhetoric and concern about weight and obesity across an increasing range of national contexts Alarmist claims about an obesity time bomb are continually recycled in policy reports reviews and white papers each of which begin with the assumption that fatness is fundamentally unhealthy and damaging to national economies With contributions from the UK Canada the USA and Australia this book offers alternative critical perspectives on this alleged public health crisis which were

in part developed through an Economic and Social Research Council seminar series on Fat Studies and Health at Every Size HAES Written by scholars from a range of disciplines and the health professions themes include an interrogation of statistical procedures used to construct the obesity epidemic overweight and obesity as cultural signifiers for Type 2 diabetes understandings of healthy eating and healthy weight in a problem population gendered expectations on men and women to lose weight the visual representation of obesity tensions when researching anti fatness critical dietitians engagement with HAES alternative ways of promoting physical activity and representations of obesity in the media This book was originally published as a special issue of Critical Public Health **The Consuming Geographies of Food** Hillary J. Shaw, 2014-04-24

The consumption and distribution of food as well as its production has become a major public policy issue over the past few decades what we eat is no longer merely a private matter but carries significant externalities for wider society Its increasing significance within the public arena implies a dissonance regarding the boundaries of food where do we draw the line between food as private and food as public What are the rights of society to impinge upon individual food consumption and what conflicts will ensue when this boundary is disputed The Consuming Geographies of Food explores these multiple issues of food across different regions of the world from the consumer s perspective It uniquely explicates the factors that lead customers towards certain typologies of consumption and towards certain types of retailing offering a comprehensive review of the obesity problem the phenomenon of food deserts and the issue of exclusion from a healthy diet It then considers the effects of food on the consumer the dynamic relationship between food and people and the issue of food exclusion before concluding with possible futures for food consumption from low technology projects to high technology scenarios Based on original research into food access ethics and consumption in both developed and less developed countries this book will be of interest to students researchers and academics in the fields of geography economics hospitality health marketing nutrition and sociology **Contested Bodies of Childhood and Youth** K. Hörschelmann, R. Colls, 2009-10-21

Demonstrating the contested and differentiated nature of childhood and youth embodiment this book responds to political and media discourses that stigmatise unruly youthful bodies by combining the critical analysis of imagined and disciplined youthful bodies with a focus on young people s lived and performed embodied subjectivities **Children's Health and Wellbeing in Urban Environments** Christina R. Ergler, Robin Kearns, Karen Witten, 2017-07-06 How children experience negotiate and connect with or resist their surroundings impacts on their health and wellbeing In cities various aspects of the physical and social environment can affect children s wellbeing This edited collection brings together different accounts and experiences of children s health and wellbeing in urban environments from majority and minority world perspectives Privileging children s expertise this timely volume explicitly explores the relationships between health wellbeing and place To demonstrate the importance of a place based understanding of urban children s health and wellbeing the authors unpack the meanings of the physical social and symbolic environments that constrain or enable children s flourishing in urban environments Drawing on

the expertise of geographers educationists anthropologists psychologists planners and public health researchers as well as nurses and social workers this book above all sees children as the experts on their experiences of the issues that affect their wellbeing Children s Health and Wellbeing in Urban Environments will be fascinating reading for anyone with an interest in cultural geography urban geography environmental geography children s health youth studies or urban planning
