and Developing Science Teachers' Pedagogical Content Knowledge J. John Loughran, Amanda Berry, Pamala Mulhall, 2006-01-01 There has been a growing interest in the notion of a scholarship of teaching Such scholarship is displayed through a teacher's grasp of and response to the relationships between knowledge of content teaching and learning in ways that attest to practice as being complex and interwoven Yet attempting to capture teachers' professional knowledge is difficult because the critical links between practice and knowledge for many teachers is tacit Pedagogical Content Knowledge PCK offers one way of capturing articulating and portraying an aspect of the scholarship of teaching and in this case the scholarship of science teaching The research underpinning the approach developed by Loughran Berry and Mulhall offers access to the development of the professional knowledge of science teaching in a form that offers new ways of sharing and disseminating this knowledge Through this Resource Folio approach comprising CoRe and PaP eRs a recognition of the value of the specialist knowledge and skills of science teaching is not only highlighted but also enhanced The CoRe and PaP eRs methodology offers an exciting new way of capturing and portraying science teachers' pedagogical content knowledge so that it might be better understood and valued within the profession This book is a concrete example of the nature of scholarship in science teaching that is meaningful useful and immediately applicable in the work of all science teachers preservice in service and science teacher educators It is an excellent resource for science teachers as well as a guiding text for teacher education

Middle School Science Education Bernard J. Nebel, 2011 No one would dream of teaching math as a helter skelter of computational skills and concepts Yet this is what typically occurs in teaching science at the K-8 level Look for a difference in the Building Foundations of Scientific Understanding series Nebel constructs and organizes lessons so that scientific skills are developed and integrated in a systematic logical way while still allowing flexibility to accommodate the individuality of children Additionally Skills of inquiry and rational thought become habits of mind as each lesson draws students hands on to examine reflect question discuss test and reason their way toward rational conclusions Lessons become meaningful and retention is enhanced by constantly relating lessons to real world experience Standards are achieved not by teaching to the test but by being natural outcomes of integrated learning Math reading writing and other subjects are easily integrated Lists of additional readings are provided with each lesson Special training for teachers is not required Teachers will learn along with their students and be excellent role models in doing so Costs are kept minimal by utilizing commonly available items and materials
