Chang,Michael S. Cookson,2018-05-10 Prostate cancer is the most frequent genitourinary malignancy that garners significant medical and media attention Over the past decade significant new

discoveries have been made that have enabled substantial improvements in screening diagnosis and management of this disease. Importantly, there has been constant evolution of the best way to treat these patients. This text will provide a single comprehensive reference source that incorporates all the latest information regarding prostate cancer. It will serve as an easy reference source for researchers, clinicians, individuals in training, allied health professionals, and medical students regarding prostate cancer by focusing on the controversial points of debate. New data regarding PSA screening, prostate cancer biomarkers, diagnostic evaluation techniques, surveillance protocols, and treatment interventions for localized and more advanced disease will be discussed. Gaps in current knowledge and areas for future research will be highlighted. Ongoing important clinical trials which could imminently yield significant new knowledge will be discussed. Uniquely to all of the above will be the clinical scenario based format of this text. For the practicing physician, the prostate cancer screening and treatment situations will hopefully become better understood. We will incorporate key educational concepts in the framework of patient situations with evidence based discussions of screening, diagnosis, evaluation, and therapeutic management. To provide even more insight, we plan on a comment section from leaders in the field that will be more opinion based, allowing the reader to get access to experienced physicians' thought processes and practice patterns. All chapters will be authored by experts in their respective fields and incorporate original figures and illustrations to the extent possible. We anticipate that this book will quickly become the ready reference source for professionals and students in various fields with an interest in the management of a complex and multifaceted disease such as prostate cancer. The book will be comprehensive and encompass the entire spectrum of prostate cancer. The information will be presented in a succinct and easily understandable manner so as to appeal to both scientists and clinicians.

**Linking agriculture and tourism to strengthen agrifood systems in Asia and the Pacific** Food and Agriculture Organization of the United Nations, 2023-08-03. Agrifood systems in Asia and the Pacific can be strengthened by tapping on agrifood tourism linkages. When tourism and agrifood systems interact, both synergies and competition appear. Agriculture and tourism compete between themselves and other sectors for land, water, labour, capital, and transport and logistics services. Cross sectoral synergies arise when agriculture and tourism influence each other through their respective demand conditions and changes in the enabling environment. These cross sectoral synergies can be instrumental in strengthening agrifood systems in the region and addressing interlinked crises in the post pandemic era. Governments across Asia and the Pacific have acknowledged the potential of tapping into agrifood tourism linkages to advance sustainable development in both urban food tourism and rural areas, mostly agricultural tourism, and are implementing efforts to develop this subsector. Agrifood tourism linkages can create income generating opportunities for farmers and tourism operators, boost employment, and stimulate overall economic growth, promote the development of sustainable agrifood systems, prevent rural youth outmigration, and help preserve culinary and agricultural heritage. This publication guides policymakers in the region in the preparation of a

strategic plan aimed at developing agrifood tourism and the tourism food value chain as drivers of sustainable development. The successful positioning of a country or location as a culinary or agricultural tourism destination and the creation of synergies between the agriculture and tourism sectors requires a shared vision and coordination between policymakers, destination managers, tourism and agrifood businesses, chefs, farmers, and other key stakeholders.
