*Language in the Context of Use* Andrea Tyler, Yiyoun Kim, Mari Takada, 2008-08-27 The volume explores key convergences between cognitive and discourse approaches to language and language learning both first and second The emphasis is on the role of language as it is used in everyday interaction and as it reflects everyday cognition The contributors share a usage based perspective on language whether they are examining grammar or metaphor or interactional dynamics which situates language as part of a broader range of systems which underlie the organization of social life and human thought While sharing fundamental assumptions about language the particulars of the areas of inquiry and emphases of those engaged in discourse analysis versus cognitive linguistics are diverse enough that historically many have tended to remain unaware of the interrelations among these approaches Thus researchers have also largely overlooked the possibilities of how work from each perspective can challenge inform and enrich the other The papers in the volume make a unique contribution by more consciously searching for connections between the two broad approaches The results are a set of dynamic thought provoking analyses that add considerably to our understanding of language and language learning The papers represent a rich range of frameworks within a usage based approach to language Cognitive Grammar Mental Space and Blending Theory Construction Grammar ethnomethodology and interactional sociolinguistics are just some of the frameworks used by the researchers in this volume The particular subjects of inquiry are also quite varied and include first and second language learning signed language syntactic phenomena interactional regulation and dynamics discourse markers metaphor theory polysemy language processing and humor The volume is of interests to researchers in cognitive linguistics discourse and conversational analysis and first and second language learning as well as signed languages

Particle Placement in English L1 and L2 Academic Writing Alexandra Kinne, 2020-09-18 This study seeks to contribute to a better understanding of how syntactic variation is affected by probabilistic factors in English as a foreign language EFL L2 exemplified by the effect of weight on the syntactic variation with English transitive verb particle constructions e.g. look up sort out and transitive verb prepositional phrase PP constructions e.g. take into account bear in mind With these constructions the particle PP may occur either adjacent to the verb or separated from the verb by a direct object noun phrase DO NP Being highly influenced by the weight of the DO NP in native L1 English little is known about the factors including syntactic weight that govern this variation in L2 English Against the background of possible native language transfer this study examines whether advanced L1 German EFL learners are sensitive to the probabilistic effect of weight on syntactic choices with verb particle PP constructions and whether there are differences when compared to English native speakers Triangulating comparative corpus data and experimental data i.e. elicited production and elicited assessment the study provides converging evidence from language production and intuition that the learners have acquired a near native awareness of weight effects in verb particle PP constructions with differences indicating a tendency to more conservative choices
