Essentials of Environmental Epidemiology for Health Protection is a key handbook and course reader for all professionals in environmental public health. Emphasising the scoping and planning stages of a study in order to avoid common pitfalls and includes discussions on the limitations of epidemiological studies, ethics and handling large datasets. Essentials of Environmental Public Health Science Naima Bradley, Henrietta Harrison, Greg Hodgson, Robie Kamanyire, Andrew Kibble, Virginia Murray, 2014-03
This book provides guidance on the technical aspects of environmental and public health investigations. The authors provide practical expert advice on a range of topics from key concepts and framework for investigation to waste management. Case studies are used to aid learning and understanding of the topics discussed. **Clay's Handbook of Environmental Health** Stephen Battersby, 2016-07-01
Clay's Handbook of Environmental Health since its first publication in 1933 has provided a definitive guide for the environmental health practitioner or reference for the consultant or student. This 21st edition continues as a first point of reference reviewing the core principles, techniques and competencies and then outlining the specialist subjects. It has been refocused on the current curriculum of the UK's Chartered Institute of Environmental Health but should also readily suit the generalist or specialist working outside the UK. Oxford Textbook of Global Public Health Roger Detels, Martin Gulliford, Quarraisha Abdool Karim, Chorh Chuan Tan, 2015-02-26
The Oxford Textbook of Global Public Health is the ultimate resource on the subject of public health and epidemiology. The sixth edition has been thoroughly revised and updated, offering a global and comprehensive perspective on wide-ranging public health needs and priorities in modern health care. The sixth edition retains its approach of dividing the complex dynamic subject of public health into three topics. The Scope of Public Health discusses the development of the discipline, determinants of health and disease, public health policies and law and ethics. Next, the textbook focuses on The Methods of Public Health, including the main science behind the discipline, epidemiology. Finally, The Practice of Public Health examines specific public health problems and the options for prevention and control. As well as identifying these issues by system or disease, there is also an awareness of the unique needs of particular population groups. New topics in this edition include Climate change, genetic testing and epidemiology, new methods for measuring the burden of disease, life course approaches to epidemiology, behavioural economics and physical activity, health and wellbeing. Two new editors, Quarraisha Abdool Karim, South Africa and Chorh Chuan Tan, Singapore, join the established editor team of Roger Detels, USA and Martin Gulliford, UK, representing a truly global outlook. The contributors are experts who have been drawn

from around the world offering perspectives from vastly different health systems with ranging public health needs and priorities The Oxford Textbook of Global Public Health remains the most comprehensive accessible text in the field and is an essential reference for students and practitioners in public health and epidemiology *Guidelines for establishing a poison centre* ,2021-01-14 **The Elgar Companion to the Built Environment and the Sustainable Development Goals** Alex Opoku,2024-02-12 Exploring the link between Sustainable Development Goals SDGs and the built environment this erudite Companion provides a comprehensive overview and critical examination of key topics and complex research issues Structured around the 5Ps of the SDGs people planet prosperity peace and partnerships the Companion suggests potential routes for the future direction of research within this multidisciplinary field of study *The Relationship Between Health and Environment Under the Lens of Climate Change: Insights for Policy Makers* Paolo Vineis,Greta Colombi,2025-02-14 The past year 2023 has been so far the hottest on track and sure enough it won't keep this record long We have already reached almost 1.5°C above the preindustrial average and the recent first Global Stocktake carried out at COP 28 which was held in Dubai last December 2023 revealed that we still need to enhance dramatically the efforts at the international level to meet Paris Agreement's goals The impacts of climate change along with other forms of anthropic pressures not only involve devastating consequences for ecosystems biodiversity and the resilience of the socio-ecological systems we live in but as it is emerging from the latest trends in scientific research it poses under serious threat also public health and well-being
