A Manifesto for Mental Health Peter Kinderman,2019-10-08 A Manifesto for Mental Health presents a radically new and distinctive outlook that critically examines the dominant disease model of mental health care Incorporating the latest findings from both biological neuroscience and research into the social determinants of psychological problems Peter Kinderman offers a contemporary biopsychosocial alternative He warns that the way we care for people with mental health problems is creating a hidden human rights emergency and he proposes a new vision for the future of health organisations across the globe The book highlights persuasive evidence that our mental health and wellbeing depend largely on the society in which we live on the things happen to us and on how we learn to make sense of and respond to those events Kinderman proposes a rejection of invalid diagnostic labels practical help rather than medication and a recognition that distress is usually an understandable human response to life's challenges Offering a serious critique of establishment thinking A Manifesto for Mental Health provides a well crafted demonstration of how with scientific rigour and empathy a revolution in mental health care is not only highly desirable it is also entirely achievable
