Essential Business Fundamentals for the Successful Eye Care Practice Savak Teymoorian, 2024-06-01 A compact business education that strategically incorporates 500 keywords to lay the foundation and over 50 action items to initiate meaningful advances and excel in your eye care practice today. Medical training is a difficult journey with enormous amounts of information to absorb over a short time period. The intense time commitment required during this process leaves little opportunity to study any other discipline. However, even the most intelligent and well intentioned provider cannot care for patients if the front door of the building is closed. Simply put, a fundamental background in business is required to effectively practice medicine. Eye care professionals which includes their ophthalmic staff can now fill the critical gap in their education with Essential Business Fundamentals for the Successful Eye Care Practice providing them the necessary basic tools to make and execute winning practice management decisions. Writing in a high density format that medical professionals will be familiar with, Dr Savak Teymoorian combines his physician training and experience as a successful ophthalmologist at Harvard Eye Associates with the knowledge acquired earning his MBA. This unique perspective allows him to provide the proper theory and execution in the business of eye care and present it in an efficient manner like that used in medical education. Each chapter is dedicated to a different subject that would routinely be taught in a masters of business administration degree tailored specifically for eye care professionals and distilled into the most critical information for a strong foundation. Each section is further enhanced with real life examples seen in ophthalmic care showing how to properly apply business strategies and tactics to obtain the best results. Chapter topics include Marketing, Leadership, Negotiations, Operations, Finance. Ophthalmologists, optometrists and eye care staff will appreciate Essential Business Fundamentals for the Successful Eye Care Practice for its efficient and relevant information to running an eye care practice whether they are currently in training and want to set themselves up for success or they are already practicing and want to fill in a deficiency in their knowledge.

Bibliography Arthur James Wells, 2007 *Secured Techno- Economic Growth of India* Dr. P. Sekhar, The book explores sector wise dimensions of security and how security undermines India's capacity to provide opportunities and services to help people sustain livelihoods. In addition, it focuses on some non-traditional security issues relative to each sector and their security implications for India. While India will continue to grow at a healthy rate, it is important for India to provide a stable economic environment in which we can grow rapidly and attract investments. The object of economic activity in any country is to promote the well-being and standard of living of the people. This book is an exhaustive effort to overview India as a nation which has a sound economic and social infrastructure. The economic infrastructure includes the roads, airports, railways, ports, telecom, and power. Education and training, tourism, and health services are included in the social infrastructure. It also reflects on the fact that despite being a highly industrialized country, agriculture is the main occupation of the people of India. This book examines growth experience in various states, region, and sectors of the India's and Growth components of India. This Book describes policies, roles, and responsibilities and the concept of operations for assessing, prioritizing, protecting, and restoring critical infrastructure and key resources (CIKR) of the India and its territories and possessions during actual or potential security risks. Hence, the book attempts to identify principal drivers of the economy in India and their contribution to economic growth. The sectors are Industry, Power, Education, Agriculture, Healthcare, Telecom, Banking, Real estate, Transport, Tourism, etc. The entire growth process will come to a screeching halt if security concerns are not timely and adequately addressed, and the value addition comes with prevention, response, restoration, and recovery efforts when there is full participation of government and industry partners.
