community knowledge activism and the perspectives of those who have experienced madness and mental health systems It is a concise text that introduces the field through an exploration of some origins of Mad Studies as well as two interrelated queries what does Mad Studies help us understand and what does Mad Studies help us do This exploration reveals that Mad Studies is an interdisciplinary intersectional and multi vocal field that demands different answers to the very meaning of the beliefs behaviours and bodymind experiences that are currently characterized as being indicative of mental illness At the heart of Mad Studies is a liberationist desire to resist transform and abolish the systems that create marginalization and implement responses to madness that are grounded in the collective knowledge of those deemed Mad This book shows that the contributions of Indigenous Black racialized queer and trans people must be understood as central to and already embedded within Mad Studies and activism rather than as add ons expansions or efforts to make Mad Studies more inclusive It will be of interest to all scholars and students of disability studies social work gender studies education health sciences sociology and psychology as well as practitioners in mental health care and those with lived experience of madness and mental health systems Artificial Hearts Shelley McKellar, 2018-01-01 A comprehensive history of the development of artificial hearts in the United States Artificial hearts are seductive devices Their promissory nature as a cure for heart failure aligned neatly with the twentieth century American medical community s view of the body as an entity of replacement parts In Artificial Hearts Shelley McKellar traces the controversial history of this imperfect technology beginning in the 1950s and leading up to the present day McKellar profiles generations of researchers and devices as she traces the heart s development and clinical use She situates the events of Dr Michael DeBakey and Dr Denton Cooley's professional fall out after the first artificial heart implant case in 1969 as well as the 1982 83 Jarvik 7 heart implant case of Barney Clark within a larger historical trajectory She explores how some individuals like former US Vice President Dick Cheney affected the public profile of this technology by choosing to be implanted with artificial hearts Finally she explains the varied physical experiences both negative and positive of numerous artificial heart recipients McKellar argues that desirability rather than the feasibility or practicality of artificial hearts drove the invention of the device Technical challenges and unsettling clinical experiences produced an ambivalence toward its continued development by many researchers clinicians politicians bioethicists and the public But the potential and promise of the artificial heart offset this ambivalence influencing how success was characterized and by whom Packed with larger than life characters from dedicated and ardent scientists to feuding Texas surgeons and brave patients this book is a fascinating case study that speaks to questions of expectations limitations and uncertainty in a The Privatization of Care Pat Armstrong, Hugh Armstrong, 2019-09-25 Nursing homes are high technology medical world where some of the most vulnerable live and work In too many homes the conditions of work make it difficult to make care as good as it can be For the last eight years an international team from Germany Sweden Norway the UK the US and Canada have been searching for promising practices that treat residents families and staff with dignity and respect in ways that can

also bring joy While we did find ideas worth sharing we also saw a disturbing trend toward privatization Privatization is the process of moving away not only from public delivery and public payment for health services but also from a commitment to shared responsibility democratic decision making and the idea that the public sector operates according to a logic of service to all This book documents moves toward privatization in the six countries and their consequences for families staff residents and eventually us all None of the countries has escaped pressure from powerful forces in and outside government pushing for privatization in all its forms However the wide variations in the extent and nature of privatization indicate privatization is not inevitable and our research shows there are alternatives The Last Plague Mark Osborne Humphries, 2013-01-11 The Spanish influenza of 1918 was the deadliest pandemic in history killing as many as 50 million people worldwide Canadian federal public health officials tried to prevent the disease from entering the country by implementing a maritime guarantine as had been their standard practice since the cholera epidemics of 1832 But the 1918 flu was a different type of disease In spite of the best efforts of both federal and local officials up to fifty thousand Canadians died In The Last Plaque Mark Osborne Humphries examines how federal epidemic disease management strategies developed before the First World War arguing that the deadliest epidemic in Canadian history ultimately challenged traditional ideas about disease and public health governance Using federal provincial and municipal archival sources newspapers and newly discovered military records as well as original epidemiological studies Humphries sweeping national study situates the flu within a larger social political and military context for the first time His provocative conclusion is that the 1918 flu crisis had important long term consequences at the national level ushering in the modern era of public health in Canada Made Modern Edward Jones-Imhotep, Tina Adcock, 2018-12-14 Science and technology have shaped not only economic empires and industrial landscapes but also the identities anxieties and understandings of people living in modern times Made Modern Science and Technology in Canadian History draws together leading scholars from a wide range of fields to enrich our understanding of history inside and outside Canada's borders The book's chapters examine how science and technology have allowed Canadians to imagine and reinvent themselves as modern Focusing on topics including exploration scientific rationality the occult medical instruments patents communication and infrastructure the contributors situate Canadian scientific and technological developments within larger national and transnational contexts The first major collection of its kind in thirty years Made Modern explores the place of science and technology in shaping Canadians experience of themselves and their place in the modern world Advancing the Inclusion of People with Disabilities, 2008 Liberalism and Hegemony Michel Ducharme, Jean-Francois Constant, 2009-04-07 The essays collected here explore the possibilities and limits presented by The Liberal Order Framework for various segments of Canadian history and within them the paramount influence of liberalism throughout the nineteenth and twentieth centuries is debated in various contexts Medicine and Technology in Canada, 1900-1950 Allison Kirk-Montgomery, Shelley McKellar, 2008 Over the past two centuries technology has played a significant

role in the understanding diagnosis and treatment of disease in Canada Technology in the form of instruments devices machines drugs and systems has aided medical science altered medical practice and changed the illness experience of patients Nineteenth century medical technology consisted of predominantly surgical and diagnostic instruments used by individual practitioners By the twentieth century large hospital based technologies operated by teams emerged as powerful tools in the identification and management of disease Our selection of diseases research initiatives and medical treatments highlights larger patterns in medicine identifies Canadian contributions and considers the impact of these innovations on Canadian society In this fifty year period public health initiatives limited the spread of contagious diseases and addressed the problem of impure water and milk Medical practitioners used X rays to diagnose tuberculosis and to treat cancer The discovery of insulin in Toronto in 1921 22 offered a management therapy for diabetes patients who were otherwise facing certain death *Bibliographic Index*, 2009 *Canadian Journal of Public Health*, 2009 *Historical Studies*, 2009 *Introducing Canada* Brian Gobbett, Robert Irwin, 1998-04-30 In addition to presenting brief descriptions of more than 1
